QUESTION 1

You have a Microsoft 365 subscription.

You need to modify the anti-spam settings to meet the following requirements:

Quarantine spam for 30 days.

Notify administrators if users are blocked for sending spam.

Every three days, provide users with a report that details which email messages were identified as spam.

Which spam filter policy should you modify to meet each requirement? To answer, drag the appropriate policies to the correct requirements. Each policy may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Policies

Answer Area

The connection filter policy

The default spam filter policy

The outbound spam filter policy

The spoof intelligence policy

Quarantine spam for 30 days:

Notify administrators if users are blocked
for sending spam:

Every three days, provide users with a report
that details which messages were identified as spam:

Correct Answer:

Policies

Answer Area

The connection filter policy

The default spam filter policy

The outbound spam filter policy

The spoof intelligence policy

Quarantine spam for 30 days:

Notify administrators if users are blocked
for sending spam:

Every three days, provide users with a report
that details which messages were identified as spam:

The default spam filter policy

The outbound spam filter policy

The default spam filter policy

QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution,

while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft 365 subscription.

Several users in the finance department of the company recently accesses unsafe websites by clicking on links in email messages.

Users in the marketing department of the company report that they must be able to access all the links embedded in email messages.

You need to reduce the likelihood of the finance department users accessing unsafe websites. The solution must affect only the finance department users.

Solution: You modify the content filtering settings.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 3

Case Study : Litware, Inc.

Case Study

Overview

Litware, Inc. is food service supplier in Europe.

PhysicalLocations

Litware has a main office in Paris and branch offices in Munich, London, Brussels, Vienna, and Rome.

Each branch office has its own compliance officer.

ExistingEnvironment

The network contains one Active Directory forest named litware.com. The forest contains a single Active Directory domain. Each office is configured as an Active Directory site. Each branch office is represented organizational unit (OU) in an

OU named Offices in Active Directory.

Each branch office has a special Administrators group that contains the delegated administrators for that office. Each Administrators group is named based on its location in a format of RegionalAdmins_Brussels, RegionalAdmins_Munich,

RegionalAdmins_London, RegionalAdmins_Vienna and RegionalAdmins_Rome.

NetworkInfrastructure

Each office contains two domain controllers from the litware.com domain. All the domain controllers are configured as DNS servers. All client computers connect only to the DNS servers in their respective office.

All offices have a high-speed connection to the Internet. Each office connects to the Internet by using a VPN appliance.

Each office has the following servers and client computers:

One reverse proxy appliance

One Microsoft Exchange Server 2019 server

One Windows Server Update Services (WSUS) server

Computers that run Windows 10 and have Microsoft Office 2019 installed. The office in Brussels contains an Exchange Server 2016 server that has the Unified Messaging role installed and hosted voicemail configured.

Mailboxes are hosted on all the Exchange servers. Public folders are hosted only on an Exchange server in the main office. Litware uses a disjoint namespace to access the servers. Each user has an archive mailbox. Archiving is configured

to use the default settings. Exchange services are published to the internet by using a reverse proxy in each office. A full backup of Exchange is performed nightly. Incremental backups occur every six hours. All the users in the transport

department connect to network resources by using a connection in the main office.

Requirements

Planned Changes

Litware plans to implement the following changes:

Implement calendar sharing to partner companies.

Implement a solution that prevents malware from being delivered to end users. Use personal archives to eliminate the need for PST files. Ensure the Brussels office and move all the users in the Brussels office to the main office. All the

mailboxes in the Brussels office will be moved to a server in the main office. Implement a compliance solution to ensure that items deleted from public folders are retained. If an item in a public folder is modified, the original version of the item

must be available.

TechnicalRequirements

Litware identifies the following technical requirements:

Minimize administrative effort.

Use the principle of least privilege.

Ensure that junk email is deleted automatically after 14 days. Ensure that sent items and deleted items are deleted automatically after 30 days. Ensure that users in the customer service department can open multiple mailboxes. Ensure that

all the former Brussels office users always maintain access to hosted voicemail. Ensure that the staff in the IT department can manage the email environment without and-user involvement.

Ensure that users cannot recover email messages that are deleted from the Junk Email folder and the Deleted Items.

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to the Junk Email folder.

Problemstatements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

HOTSPOT

Use the drop-down menus to select the answer choice that complete each statement based on the information presented in the Exchange Online Connector exhibit.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

To meet the security requirements for the email messages received from fabrikam.com, set **(answer choice)** to *, fabrikam.com.

	▼
AssociatedAcceptedDomains	
ConnectorSource

QUESTION 4

Overview

General Overview

Contoso, Ltd. is a national freight company in the United States. The company has 15,000 employees.

PhysicalLocations

Contoso has a main office in Houston and 10 branch offices that each contains 1,000 employees.

ExistingEnvironment

Active Directory and Microsoft Exchange Server Environments The network contains an Active Directory forest named contoso.com. The forest contains one root domain named contoso.com and 10 child domains. All domain controllers run

Windows Server 2019.

The forest has Active Directory Certificate Services (AD CS) and Active Directory Federation Services (AD FS) deployed.

You have a hybrid deployment of Exchange Server 2019 and Microsoft Office 365.

There are 2,000 user mailboxes in Exchange Online.

Each office contains two domain controllers and two Mailbox servers. the main office also contains an Edge transport server.

The organization contains 100 public folders. The folders contain 80 GB of content. All email messages sent to contoso.com are delivered to Exchange Online. All messages sent to onpremises mailboxes are routed through the Edge

Transport server. Advanced Threat Protection (ATP) is enabled and configured for the Office 365 tenant.

NetworkInfrastructure

Each office connects directly to the Internet by using a local connection. The offices connect to each other by using a WAN link.

Requirements

Planned Changes

Contoso plans to implement the following changes:

1.
or all new users in the on-premises organization, provide an email address that uses the value of the Last Name attribute and the first two letters of the First Name attribute as a prefix.
- 2.

ecommission the public folders and replace the folders with a Microsoft 265 solution that maintains web access to the content.

Technical Requirements

Contoso identifies the following technical requirements:

1.

All email messages sent from a SMTP domain named adatum.com must never be identified as spam.

2.

Any solution to replace the public folders must include the ability to collaborate with shared calendars.

Security Requirements

Contoso identifies the following security requirements:

1.

The principle of least privilege must be applied to all users and permissions.

2.

All email messages sent from an SMTP domain named com to contoso.com must be encrypted.

3.

All users must be protected from accessing unsecure websites when they click on URLs embedded in email messages.

4.

If a user attempts to send an email message to a distribution group that contains more than 15 members by using Outlook, the user must receive a warning before sending the message.

Problemstatements Recently, a user named HelpdeskUser1 erroneously created several mailboxes. Helpdesk1user1 is a member of the Recipient Management management role group. Users who have a mailbox in office 365 report that it takes a long time for email messages containing attachments to be delivered.

QUESTION 5

You have a Microsoft Exchange Server 2019 organization.

You purchase a Microsoft 365 subscription.

An administrator configures Microsoft Azure Active Directory (Azure AD) synchronization.

You configure several users in the on-premises organization to use archive mailboxes in Exchange Online.

The users report that their archive mailbox does not appear in Microsoft Outlook.

You need to ensure that the users can access their archive mailbox.

- A. Rerun the Microsoft Office 365 Hybrid Configuration wizard
- B. Reconfigure the sharing policy
- C. Reconfigure the organization relationship
- D. Rerun Azure AD Connect and select Exchange hybrid deployment

Correct Answer: D
