QUESTION 1

You have a Microsoft Exchange Server 2019 organization.

You purchase a Microsoft 365 subscription.

An administrator configures Microsoft Azure Active Directory (Azure AD) synchronization.

You configure several users in the on-premises organization to use archive mailboxes in Exchange Online.

The users report that their archive mailbox does not appear in Microsoft Outlook.

You need to ensure that the users can access their archive mailbox.

- A. Rerun the Microsoft Office 365 Hybrid Configuration wizard
- B. Reconfigure the sharing policy
- C. Reconfigure the organization relationship
- D. Rerun Azure AD Connect and select Exchange hybrid deployment

Correct Answer: D

QUESTION 2

You have a Microsoft Exchange Server 2019 organization.

You need to ensure that all email is retained for one year, and then moved to an archive mailbox.

What should you use?

- A. a default policy tag
- B. a data loss prevention (DLP) policy
- C. a personal tag
- D. a retention policy tag

Correct Answer: D

QUESTION 3

You have a Microsoft 365 subscription that uses a default domain named contoso.com.

Users report that email messages from a domain named fabrikam.com are identified as spam even through the messages are legitimate.

You need to prevent messages from fabrikam.com from being identified as spam.

What should you do?

- A. Edit a spam filter policy
- B. Enable the safe list on a connection filter
- C. Create a new remote domain
- D. Enable the Zero-hour auto purge (ZAP) email protection feature

Correct Answer: A

QUESTION 4

Case Study : Litware, Inc.

Case Study

Overview

Litware, Inc. is food service supplier in Europe.

PhysicalLocations

Litware has a main office in Paris and branch offices in Munich, London, Brussels, Vienna, and Rome.

Each branch office has its own compliance officer.

ExistingEnvironment

The network contains one Active Directory forest named litware.com. The forest contains a single Active Directory domain. Each office is configured as an Active Directory site. Each branch office is represented organizational unit (OU) in an

OU named Offices in Active Directory.

Each branch office has a special Administrators group that contains the delegated administrators for that office. Each Administrators group is named based on its location in a format of RegionalAdmins_Brussels, RegionalAdmins_Munich,

RegionalAdmins_London, RegionalAdmins_Vienna and RegionalAdmins_Rome.

NetworkInfrastructure

Each office contains two domain controllers from the litware.com domain. All the domain controllers are configured as DNS servers. All client computers connect only to the DNS servers in their respective office.

All offices have a high-speed connection to the Internet. Each office connects to the Internet by using a VPN appliance.

Each office has the following servers and client computers:

One reverse proxy appliance

One Microsoft Exchange Server 2019 server

One Windows Server Update Services (WSUS) server

Computers that run Windows 10 and have Microsoft Office 2019 installed. The office in Brussels contains an Exchange Server 2016 server that has the Unified Messaging role installed and hosted voicemail configured.

Mailboxes are hosted on all the Exchange servers. Public folders are hosted only on an Exchange server in the main office. Litware uses a disjoint namespace to access the servers. Each user has an archive mailbox. Archiving is configured

to use the default settings. Exchange services are published to the internet by using a reverse proxy in each office. A full backup of Exchange is performed nightly. Incremental backups occur every six hours. All the users in the transport

department connect to network resources by using a connection in the main office.

Requirements

Planned Changes

Litware plans to implement the following changes:

Implement calendar sharing to partner companies.

Implement a solution that prevents malware from being delivered to end users. Use personal archives to eliminate the need for PST files. Ensure the Brussels office and move all the users in the Brussels office to the main office. All the

mailboxes in the Brussels office will be moved to a server in the main office. Implement a compliance solution to ensure that items deleted from public folders are retained. If an item in a public folder is modified, the original version of the item

must be available.

Technical Requirements

Litware identifies the following technical requirements:

Minimize administrative effort.

Use the principle of least privilege.

Ensure that junk email is deleted automatically after 14 days. Ensure that sent items and deleted items are deleted automatically after 30 days. Ensure that users in the customer service department can open multiple mailboxes. Ensure that

all the former Brussels office users always maintain access to hosted voicemail. Ensure that the staff in the IT department can manage the email environment without end-user involvement.

Ensure that users cannot recover email messages that are deleted from the Junk Email folder and the Deleted Items.

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to the Junk Email folder.

Problem statements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

You need to recommend a solution to retain the items in the public folders. The solution must support the planned changes.

What should you recommend?

- A. Create an Outlook rule that forwards all the items in each public folder to a compliance mailbox.
- B. Place an In-Place Hold on all the mailboxes of the public folders.
- C. Increase the frequency of the backups.
- D. Modify the public folder permissions.

Correct Answer: B

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You create a new Microsoft 365 E5 subscription.

You need to identify which administrator deleted mailboxes during the last two days.

Solution: From the Exchange admin center, you run the admin audit log report.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: A
