QUESTION 1

You have a Microsoft Exchange Online tenant that contains a mailbox named Sales.

You need to create a copy of all the external email sent from the Sales mailbox to an alternate location.

What should you create?

- A. a journaling rule
- B. a retention policy
- C. a records management file plan
- D. a data loss prevention (DLP) policy

Correct Answer: A

Explanation:

Journaling in Exchange Online

When possible, we recommend that you use Microsoft 365 retention to archive and manage data in-place to meet your compliance requirements. However, some organizations might need to use a third-party solution to receive a copy of

emails for storage or other scenarios. Configure journaling to store that data outside Exchange.

Journal rules

The following are key aspects of journal rules:

Journal rule scope: Defines which messages are journaled by the Journaling agent.

Journal recipient: Specifies the SMTP address of the recipient you want to journal.

Journaling mailbox: Specifies one or more mailboxes used for collecting journal reports.

Incorrect:

*

a retention policy

Managing content commonly requires two actions:

*

Retain content

Prevent permanent deletion and remain available for eDiscovery

*

Delete content

Permanently delete content from your organization

With these two retention actions, you can configure retention settings for the following outcomes:

Retain-only: Retain content forever or for a specified period of time.

Delete-only: Permanently delete content after a specified period of time.

Retain and then delete: Retain content for a specified period of time and then permanently delete it.

These retention settings work with content in place that saves you the additional overheads of creating and configuring additional storage when you need to retain content for compliance reasons. In addition, you don't need to implement

customized processes to copy and synchronize this data.

QUESTION 2

DRAG DROP

Your company has a Microsoft Exchange Online subscription for an email domain named contoso.com.

The company works with a partner company that uses an email domain named tailspintoys.com.

You need to configure the environment only to accept email from tailspintoys.com if the email is sent from an IP address of 131.107.12.85.

How should you configure the connector from the Exchange admin center? To answer, drag the appropriate options to the correct message settings. Each option may be used once, more than once, or not at all. You may need to drag the split

bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Name	SMTP domain	Email platform
Fabrikam, Inc.	Fabrikam.com	On-premises Exchange Server 2019
Contoso, Ltd.	Contoso.com	Third-party email server
Litware, Inc.	Litware.com	Exchange Online

Correct Answer:

Answer Area

Statements	Yes	No
For User1 to share contacts with the users at Fabrikam, a federation trust is required.	<input type="radio"/>	<input type="radio"/>
User2 can share free/busy hours, subject, and location with the users at Contoso.	<input type="radio"/>	<input type="radio"/>
User3 can share calendars with the users at Litware.	<input type="radio"/>	<input type="radio"/>

QUESTION 3

HOTSPOT

You need to implement a solution that meets the technical requirements for the retention of junk email, sent items, and deleted items.

What is the minimum number of retention policies and retention tags you should use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Actions

Create a shared mailbox for App1service

In Azure AD, register an enterprise application for App1

Sync the App1service account to Azure AD

Create a user mailbox for App1service

Assign a license to App1service

Assign app1@contoso.com as an email address to App1service

Answer Area

Correct Answer:

Actions	Answer Area
Create a shared mailbox for App1service	Sync the App1service account to Azure AD
In Azure AD, register an enterprise application for App1	Assign a license to App1service
	Assign app1@contoso.com as an email address to App1service
Create a user mailbox for App1service	

Box 1: 3

A Retention Policy Tag (RPT) is a type of retention tag that you can apply to default folders in a mailbox, such as Inbox and Deleted Items.

We need three retention policy tags, one for Junk, one for Deleted Items and one for Sent items.

Box 2: 1

QUESTION 4

You need to ensure that Alex Wilbur can recover deleted items when using Outlook on the web. Which two actions should you perform? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Assign Sales Policy to Alex Wilbur.
- B. Modify Marketing Policy.
- C. Remove Alex Wilbur from all groups.
- D. Assign Policy2 to Alex Wilbur.
- E. Modify Policy1.

Correct Answer: D

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft 365 subscription.

Several users in the finance department of the company recently accessed unsafe websites by clicking on links in email messages.

Users in the marketing department of the company report that they must be able to access all the links embedded in email messages.

You need to reduce the likelihood of the finance department users accessing unsafe websites. The solution must affect only the finance department users.

Solution: You modify the content filtering settings.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B
