QUESTION 1

Your network contains an Active Directory domain named fabrikam.com.

You have a Microsoft Exchange Server 2019 organization that contains two Mailbox servers in a database availability group (DAG).

You plan to implement a hybrid deployment by using the Exchange Modern Hybrid connection option.

Which three configurations will be transferred automatically from the on-premises organization to Exchange Online? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. the device access rules
- B. the address book policies (ABPs)
- C. the Messaging Records Management (MRM) settings
- D. the mail flow rules
- E. the address lists

Correct Answer: ACE

QUESTION 2

You need to recommend a procedure for closing the Brussels office that meets the technical requirements. What should you recommend?

- A. In the main office, deploy an Exchange Server 2016 server that has the Unified Messaging role installed, and then move the mailboxes from the Brussels office to the new server.
- B. Deploy a Microsoft Skype for Business 2019 server to the main office, and then move the mailboxes from the Brussels office to an Exchange Server 2019 server in the main office.
- C. Implement a new mailbox database on an Exchange Server 2019 server in the main office, and then move the mailboxes from the Brussels office to the new mailbox database.
- D. Implement a new database availability group (DAG) that contains the server in the Brussels office and a new Exchange Server 2019 server in the main office, and then create a mailbox database copy on the new server in the main office.

Correct Answer: C

QUESTION 3**HOTSPOT**

You have a Microsoft Exchange Online tenant named contoso.com.

Email messages from a remote domain named fabrikam.com are received from a server that uses a wildcard certificate for fabrikam.com and are encrypted by using TLS.

Fabrikam.com is switching to a third-party cloud filtering service for inbound and outbound email. The IP address used by the third-party service is 131.107.200.10.

You need to reconfigure the connector to only accept messages from fabrikam.com that are encrypted and received from the third-party service.

Which two settings should you modify for the connector? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Name	Title	Country
Meeting Room 1	Sales Office MR1	Canada
Meeting Room 2	Marketing Partner	Mexico

Correct Answer:

Answer Area

Statements	Yes	No
User2 is included on the address list.	<input type="radio"/>	<input type="radio"/>
User3 is included on the address list.	<input type="radio"/>	<input type="radio"/>
Meeting Room 1 and Meeting Room 2 are included on the address list.	<input type="radio"/>	<input type="radio"/>

QUESTION 4

HOTSPOT

You have a Microsoft Exchange Online tenant.

You plan to filter all inbound and outbound email messages by using a third-party message hygiene solution.

You need to ensure that all the email sent and received by the tenant is filtered through the message hygiene solution. The solution must ensure that only the message hygiene solution can send email to the tenant.

What should you configure for the tenant? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

QUESTION 5

You have a Microsoft Exchange Online tenant that uses Microsoft Defender for Office 365.

You have a Safe Attachments policy named Policy1.

You have a partner company that has an email domain named fabrikam.com.

You need to prevent email messages received from fabrikam.com from being scanned by Policy1.

What should you do?

- A. Add the fabrikam.com domain to the Tenant Allow/Block List.
- B. Create a mail flow rule and set the X-MS-Exchange-Organization-SkipSafeAttachmentProcessing header to 0.
- C. Create a new Safe Attachments policy and exclude the fabrikam.com domain.
- D. Create a mail flow rule and set the X-MS-Exchange-Organization-SkipSafeAttachmentProcessing header to 1.

Correct Answer: C

Explanation:

Use the Microsoft 365 Defender portal to create Safe Attachments policies

On the Users and domains page that appears, identify the internal recipients that the policy applies to.

Exclude these users, groups, and domains: To add exceptions for the internal recipients that the policy applies to (recipient exceptions), select this option and configure the exceptions. The settings and behavior are exactly like the conditions.
