## QUESTION 1

Note: This Question is part of a series of Questions that present the same scenario. Each Question in the series contains a unique solution that might meet the stated goals. Some Question sets might have more than one correct solution,

while others might not have a correct solution.

After you answer a Question in this section, you will NOT be able to return to it. As a result, these Questions will not appear in the review screen.

You have a Microsoft 365 subscription.

SharePoint administrators open several Microsoft support tickets.

You need to view the status of the support tickets.

Solution: From the Microsoft 365 admin center, you select Support, and then you select View service requests.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

On the Service requests page you can view the status of any service requests that you have filed on your clients' behalf. You can also search for them by supplying a reference number, or by the company name.

---

## QUESTION 2

You have a SharePoint Server farm.

You configure the farm to support custom tiles, and you add an item to the custom tiles list. You open a web browser and discover that the new item does not appear in the app launcher. You need to ensure that the tile appears immediately in

the app launcher.

What should you do?

A. From the developer tools of the web browser, run the `ClearSuiteLinksCache()` function.

B. From the developer tools of the web browser, run `applicationCache.swapCache`.

C. Call the `Update()` method of the website by using PowerShell.

D. Increase the Title Order value associated to the custom title.

Correct Answer: A

---

### QUESTION 3

You have a SharePoint hybrid environment.

When you run a search on-premises, you do not see any results from SharePoint Online on the results page.

You need to ensure that SharePoint Online results appear on the search results page along with the results from on-premises SharePoint Server.

Which two objects should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a search results page in on-premises SharePoint Server
- B. a result source in on-premises SharePoint Server
- C. a query rule in on-premises SharePoint Server
- D. a search results page in SharePoint Online
- E. a result source in SharePoint Online
- F. a query rule in SharePoint Online

Correct Answer: BC

### QUESTION 4

You have a Microsoft 365 subscription.

You plan to use Microsoft Stream to share corporate videos. You need to reduce the amount of network traffic generated by live events and videos on Stream.

What should you do?

- A. Publish the videos in low resolution
- B. Convert the videos to MP4
- C. Turn on Enable 3rd party network caching provider
- D. Turn on ReRequire company policy acceptance

Correct Answer: C

For organizations that want to reduce network traffic for live events and popular videos, Microsoft Stream can be enabled to integrate with Microsoft's trusted video delivery partners offering enterprise content delivery networks (eCDNs). These eCDN platforms enable organizations to optimize network bandwidth without sacrificing end user viewing experiences. After purchasing and setting up your eCDN solution then you can enable it to be used with Microsoft Stream including "External encoder" live events created through Microsoft Teams or Yammer.

1.  
Sign in to Microsoft Stream as a Global Admin or a Stream Admin
  2.  
Gear > Admin settings
  3.  
Network caching tab
  4.  
Toggle the Enable 3rd party network caching provider to On
  5.  
Choose a caching provider from the drop down
  6.  
Fill out the other fields as directed by your caching provider. (Not all fields are used by all caching providers.)
  7.  
Save References: <https://docs.microsoft.com/en-us/stream/ecdn>
- 

#### QUESTION 5

Your company has 200 remote users who have laptops that run Windows 10. The users store files in Microsoft OneDrive for Business. You are configuring new laptops that will be deployed to the users. The new laptops have a smaller hard

disk than current laptops. You need to minimize the amount of disk space used by OneDrive on the new laptops.

Which Group Policy setting should you configure?

- A. Set the maximum percentage of upload bandwidth that OneDrive.exe uses
- B. Set the default location for the OneDrive folder
- C. Prevent users from synchronizing personal OneDrive accounts
- D. Enable OneDrive Files On-Demand

Correct Answer: D

OneDrive Files On-Demand helps you access all your files in OneDrive without having to download all of them and use

storage space on your Windows device. When you turn on Files On-Demand, you'll see all your files in File Explorer and get new information about each file. New files created online or on another device appear as online-only files, which don't take up space on your device. When you're connected to the Internet, you'll be able to use the files like every other file on your device.
