QUESTION 1

You are developing a Microsoft Teams app that will display differently depending on the current UI theme applied to Microsoft Teams.

You need to retrieve the current theme by using the Microsoft Teams JavaScript client SDK?

Which function should you call?

- A. microsoftTeams.getContext
- B. microsoftTeams.settings.getSettings
- C. microsoftTeams.getMruTabInstances
- D. microsoftTeams.initialize

Correct Answer: A

QUESTION 2

This question requires that you evaluate the bold text to determine if it is correct.

You can use a Command Set extension to develop a breadcrumb element that will appear on every Microsoft SharePoint page.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. an Application Customizer
- C. a Field Customizer
- D. a web part

Correct Answer: B

Application Customizers provide access to well-known locations on SharePoint pages that you can modify based on your business and functional requirements. For example, you can create dynamic header and footer experiences that render across all the pages in SharePoint Online. QUESTION 3

HOTSPOT

You need to recommend the development environment and tools for the development of SalesApp.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Development model: ▼

Office Add-ins
SharePoint Framework (SPFx) web parts
Microsoft Visual Studio Tools for Office (VSTO)

IDE: ▼

Script Lab
Microsoft Visual Studio
Microsoft Visual Studio Code

Front-end framework: ▼

Fluent UI
Bootstrap
Material Design

Correct Answer:

Development model: ▼

QUESTION 5

You have a single-page application (SPA) named TodoListSPA and a server-based web app named TodoListService.

The permissions for the TodoList SPA API are configured as shown in the TodoList SPA exhibit. (Click the TodoListSPA tab.)

API/PERMISSIONS NAME	TYPE	DESCRIPTION	ADMIN CONSENT REQUIRED
▼ TodoListService-OBO-sample-v2 (1)			
user_impersonation	Delegated	Access TodoListService-OBO-sample-v2	

The permissions for the TodoListService API are configured as shown in the TodoListService exhibit. (Click the TodoListService tab.)

API/PERMISSIONS NAME	TYPE	DESCRIPTION
▼ Microsoft Graph (1)		
UserRead	Delegated	Sign in and read user profile

You need to ensure that TodoListService can access a Microsoft OneDrive file of the signed-in user. The solution must

use the principle of least privilege. Which permission should to grant?

- A. the Sites.Read.All delegated permission for TodoListService
- B. the Sites.Read.All delegated permission for TodoListSpa
- C. the Sites.Read.All application permission for TodoListSPA
- D. the Sites.Read.All application permission for TodoListService

Correct Answer: A

A client application gains access to a resource server by declaring permission requests. Two types are available:

"Delegated" permissions, which specify scope-based access using delegated authorization from the signed-in resource owner, are presented to the resource at run-time as "scp" claims in the client's access token. "Application" permissions, which specify role-based access using the client application's credentials/identity, are presented to the resource at run-time as "roles" claims in the client's access token.
