QUESTION 1

This question requires that you evaluate the underlined text to determine if it is correct.

Microsoft 365 is a Platform as a service (PaaS).

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

A. Infrastructure as a service (IaaS)

B. Windows as a service (WaaS)

C. Software as a service (Saas)

D. No change is needed

Correct Answer: C

Microsoft 365 is SaaS, which provides an online version of MS Office Suite (Office Web Apps) along with SharePoint Server, Exchange Server and Lync Server.

QUESTION 2

DRAG DROP

A company uses Microsoft 365.

The company has the following requirements:

1.

Team 1 users need to use web-based email and calendaring.

2.

Team 2 users need to use email and calendaring. They also need to hold telephone calls with clients and host online meetings.

3.

Team 3 users need access to tools that provide task and shift management

4.

Licensing costs need to be minimized.

Match each license to the appropriate users. To answer, drag the appropriate license from the column on the left to its

appropriate user on the right. Each license may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Select and Place:

Licenses		Answer Area	
Microsoft 365 E3		**User**	**License**
Microsoft 365 E5		Team1	
Microsoft 365 F3		Team2	
		Team3	

Correct Answer:

Licenses		Answer Area	
Microsoft 365 E3		**User**	**License**
Microsoft 365 E5		Team1	Microsoft 365 F3
Microsoft 365 F3		Team2	Microsoft 365 E5
		Team3	Microsoft 365 F3

QUESTION 3

After acquiring a Microsoft 365 E5 subscription, you are tasked with applying security features.

You are currently configuring a security feature that allows you to control how a Microsoft support engineer accesses information during a help session.

Which of the following is the feature you are configuring?

A. Customer Lockbox.

B. Data Governance.

C. Data Loss Prevention.

D. Microsoft Office 365 Advanced Threat Protection.

Correct Answer: A

QUESTION 4

You are an IT director that is evaluating the capabilities of Microsoft Endpoint Manager.

You need to present the capabilities to key stakeholders.

Which three capabilities should you present to the stakeholders? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Set up and preconfigure new Windows devices.

B. Monitor on-premises servers.

C. Report on cloud-based security event information.

D. Manage cloud-based mobile devices.

E. Deploy on-premises desktop apps.

Correct Answer: ACD

AD: Microsoft Endpoint Manager includes Microsoft Intune.

Microsoft Intune is the platform\\'s solution for cloud-based mobile device management, mobile application management, and cloud-based PC management. Also a part of Microsoft Enterprise Mobility + Security (EMS), Intune delivers security

and access control features for devices and applications in your infrastructure. You can manage enrolled devices, inventory all devices currently on your infrastructure, configure the health and security of devices, push certificates to devices,

check device and user compliance, and remotely wipe sensitive data from lost or stolen devices.

C: Endpoint analytics Endpoint analytics is a cloud-native service that provides metrics and recommendations on the health and performance of your Windows client devices. If you use Configuration Manager, you can benefit from Endpoint Analytics insights by connecting to the cloud.

You can get data on:

Startup performance How frequently devices restart A list of apps that affect end-user productivity Recommendations on how to improve performance This information and more is shown in the Microsoft Endpoint Manager admin center.

QUESTION 5

A company is planning to implement Microsoft 365.

The company has not purchased licenses from Microsoft.

You need to recommend a licensing solution.

Which licensing solution should you recommend?

A. Full user subscription licenses

B. Step-up user subscription licenses

C. Add-on user subscription licenses

D. From Software Assurance (SA) user subscription licenses

Correct Answer: A

Incorrect:

Not B: Step-up USLs

Are for Microsoft 365 customers who want to upgrade the level of their service during the term of the enrollment or agreement. These licenses must be purchased on the same agreement or enrollment as the base license from which the

customer is upgrading.

Not D: What does Software Assurance do? Microsoft Software Assurance provides licenses for version upgrades. Software Assurance customers automatically receive licensing rights that will allow them to deploy new software versions

whenever they are released.
