QUESTION 1

The primary advantage of an oblique drawing is that _____.

- A. It shows the most realistic view of an object
- B. All three axes are drawn at the same scale
- C. Existing orthographic drawings can be used as a starting point
- D. It shows foreshortened lines and planes accurately

Correct Answer: C

QUESTION 2

In which situation should you use a construction change directive?

- A. To request an electrical contractor not listed by the contractor in the bid [tender] documents
- B. To request pricing for an additional receptacle per the client's request
- C. To provide additional dimensions to the contractor regarding a receptacle location
- D. To relocate an electrical receptacle because of revised furniture plans

Correct Answer: D

QUESTION 3

The designer for the interior furnishings of a large public hospital project financed with bond money has assisted the city government in preparing the bidding documents. When the bids from five qualified contractors are open, they are all over budget, ranging from 4% to 10% over the approved costs.

What should the designer do?

- A. Recommend that the city accept the lowest bid and obtain the extra 4% from other sources
- B. Begin to study ways to reduce the project scope so it meets the budget
- C. Suggest that the project be rebid because the lowest bid is so close to the budget
- D. Wait for the city to tell the designer how it wants to proceed

Correct Answer: B

QUESTION 4

A quick-sketch perspective drawing could most easily be made by _____.

- A. Employing a computer model
- B. Plotting the perspective
- C. Tracing over a model photograph
- D. Using a perspective grid

Correct Answer: D

QUESTION 5

The two most important factors in determining the number of exits required for a particular room or space are _____.

- A. Occupancy and the distance from the room exit to the building exit
- B. The exit widths and common path of egress travel
- C. The occupant load and building size
- D. The occupancy and the occupant load

Correct Answer: D
