- A. Open File Manager
- B. Virtual File Manager
- C. Operations Manager
- D. File Storage Resource Manager

Correct Answer: B

QUESTION 2

A customer requires the ability to recover a file services environment with a maximum of 10 minutes of data loss. NetApp is the storage at both the source and the target disaster recovery site. Which solution should you propose to this customer?

- A. SnapMirror
- B. SnapVault
- C. ReplicatorX
- D. Open SystemsSnapVault

Correct Answer: A

QUESTION 3

What is Decru Lifetime Key Management?

- A. a separate management role needed because key management is so complicated
- B. a software utility or appliance that securely automates archiving of encryption keys across the enterprise so that data is always available regardless of where or how long ago it was stored
- C. the team of administrators who look after encryption keys for a site
- D. the process by which encryption keys are transferred between DataForts

Correct Answer: B

QUESTION 4

Upstream oil and gas environments periodically need to access a writable copy of the production data as it existed at a previous point in time. Which NetApp technologies provide the most efficient way to provide this type of access?

- A. Snapshot and FlexClone
- B. Snapshot and SnapRestore
- C. FlexShare and FlexCache
- D. Snapshot and RAIDDP

Correct Answer: A

QUESTION 5

Which process accurately describes NetApp Snapshot copies?
