## QUESTION 1

Click the Exhibit tab.

```
cluster::> cifs share show -vserver SVM1 -share-name test9

Vserver: SVM1
Share: test9
CIFS Server NetBIOS Name: SVM1
Path: /test9
Share Properties: oplocks
browsable
changenotify
Symlink Properties: symlinks
File Mode Creation Mask: -
Directory Mode Creation Mask: -
Share Comment: -
Share ACL: Everyone / No access
domainA\companyusers / Full Control
domainA\interngroup / No access
domainA\temps / Read
File Attribute Cache Lifetime: -
Volume Name: vol9
Offline Files: manual
Vscan File-Operations Profile: standard
Maximum Tree Connections on Share: 4294967295
UNIX Group for File Create: -
```

A storage administrator tells you that a company security mandate was applied to remove all CIFS share level permissions of everyone - full control. Now users are unable to access CIFS shares.

The storage virtual machine (SVM) is named "SVM1" on clustered Data ONTAP 8.3.1. The storage administrator wants to know what can be done to restore full control access to users that are receiving "access denied" errors. The storage administrator has provided you with the vserver cifs share show command output of one of the CIFS shares with issues as shown in the exhibit.

Which two steps must you perform to solve the problem? (Choose two.)

- A. Execute the `::>vserver cifs share access-control delete -vserver SVM1 -share test9 -user-or-group Everyone` command from the controller.
- B. Execute the `::>vserver cifs share access-control delete -vserver SVM1 -share test9 -user-or-group domain\interngroup` command from the controller.
- C. Ensure that, in Active Directory, the desired users are members of the `domainA\tempsgroup`.
- D. Ensure that, in Active Directory, the desired users are members of the `domainA\companyusersgroup`.

Correct Answer: BD

## QUESTION 2

A customer explains that their V3170 NetApp controller has failed over and they do not know what to do next.

In this scenario, what information should the customer collect from the Remote LAN Module (RLM) and send to you? (Choose two.)

- A. output from thesystem logcommand
- B. output from theevents infocommand
- C. output from thesp statuscommand
- D. output from theevents allcommand

Correct Answer: AC

---

### QUESTION 3

Which version of Data ONTAP would disable access to FilerView in favor of using OnCommand System Manager for management?

- A. 8.2
- B. 8.0
- C. 7.3
- D. 8.1

Correct Answer: D

---

### QUESTION 4

An existing aggregate with a maximum RAID size of 6 has four existing RAID groups with three disks in each RAID group. There are nine spare disks available. All disks on the node are the same type and size. What will be the result of adding all nine spare disks to the aggregate?

- A. You receive the "maximum number of raidgroups exceeded" error.
- B. The aggregate will have seven RAID groups.
- C. The aggregate will have three RAID groups.
- D. The aggregate will have five RAID groups.

Correct Answer: D

---

Your customer has recently migrated from their FAS3140 system running Data ONTAP 7.3.7 to a FAS2552 system running Data ONTAP 8.2.3 7-Mode through the head upgrade process. They are no longer receiving the weekly AutoSupport notifications and want to know why. The exhibit shows the AutoSupport options from the nodes that have the same settings.

In this scenario, which solution is correct?

- A. There is no reason on the FAS2552 side why the customer should not receive the AutoSupport notifications. They should investigate their mail server to troubleshoot this issue.
- B. In Data ONTAP 8.2, weekly AutoSupport notifications are no longer sent to the auto support.torecipient, but only toautosupport.partner.toand toautosupport.support.to. The customer needs to add their e-mail address to one of these options.
- C. In Data ONTAP 8.2, the protocol for AutoSupport is changed to HTTPS by default, so the customer must have an HTTPS destination for the AutoSupport data.
- D. In Data ONTAP 8.2, weekly AutoSupport notifications are no longer sent to all recipients to reduce the mail load. The customer should add their e-mail address to theautosupport.partner.tooption.

Correct Answer: B
