QUESTION 1

Click the Exhibit button.

Referring to the exhibit, what must be performed on nodes aff-01 and aff-02 to allow them to failover and giveback properly?

- A. Disconnect the HA connection between the nodes.
- B. Reboot aff-02 to resolve the LIF issue.
- C. No additional action is necessary.
- D. Move the LIFs to their home ports.

Correct Answer: D

QUESTION 2

You have deployed volume-level replication with NetApp Synchronous SnapMirror replication technology. In this scenario, which two statements are true? (Choose two.)

- A. In Sync mode, the application I/O fails if the write to the secondary storage is not completed, thereby ensuring that the primary and secondary storage are identical.

- B. In StrictSync mode, the application is allowed to continue writing to the primary storage if the write to the secondary storage is not completed.
- C. In Sync mode, the application is allowed to continue writing to the primary storage if the write to the secondary storage is not completed.
- D. In StrictSync mode, the application I/O fails if the write to the secondary storage is not completed, thereby ensuring that the primary and secondary storage are identical.

Correct Answer: CD

QUESTION 3

You want to determine the amount of cold data that can be tiered from a FabricPool-enabled aggregate. In this scenario, which feature satisfies this requirement?

- A. Inactive Data Reporting
- B. Information Lifecycle Management
- C. Object Store Profiler
- D. Auto Balance

Correct Answer: A

First available in ONTAP 9.4, inactive data reporting (IDR) is an excellent tool for determining the amount of inactive (cold) data that can be tiered from an aggregate. IDR is enabled by default on FabricPool aggregates. More important, you can enable it on non-FabricPool aggregates by using the ONTAP CLI, to get visibility on how much you can gain by deploying FabricPool.

QUESTION 4

You recently set up a SnapMirror relationship with a daily update schedule. You want to verify that the updates are being performed daily. Which two actions inside OnCommand System Manager would you ensure that the SnapMirror transfers are occurring daily? (Choose two.)

- A. In the Jobs window, verify that all manual Snapshot copy operations have completed in the past 24 hours.
- B. In the Jobs window, verify that all SnapMirror jobs have completed within the past 24 hours.
- C. In the Relationships window, verify that the relationship state was broken in the past 24 hours.
- D. In the Relationships window, verify that the lag time is less than 24 hours.

Correct Answer: BD

**QUESTION 5**

Your customer wants to deploy 40 ONTAP clusters in their environment to protect client databases, Windows host file systems, applications, and virtual machines. One of the primary monitoring and system management requirements is to use a centralized dashboard for all application-consistent backups and REST API integration. In this scenario, which NetApp management tool satisfies the requirements?

- A. Element Manager
- B. SnapCenter
- C. OnCommand Unified Manager
- D. OnCommand System Manager

Correct Answer: B
