QUESTION 1

Refer to the exhibit.

The screenshot shows the 'Create New ADOM' configuration page in FortiManager. The 'Name' field is set to 'Training'. The 'Type' is set to 'FortiGate', with version options 6.2, 6.0, 5.6, and 5.4. The 'Comments' field is empty. The 'Devices' section has a '+ Select Device' button and a table with columns 'Name', 'IP Address', and 'Platform'. The table contains the text 'Click to select devices for this ADOM.' The 'Mode' is set to 'Normal' (radio button selected) and 'Backup' (radio button unselected).

Which two statements about an ADOM set in Normal mode on FortiManager are true? (Choose two.)

- A. It supports the FortiManager script feature
- B. It allows making configuration changes for managed devices on FortiManager panes
- C. FortiManager automatically installs the configuration difference in revisions on the managed FortiGate
- D. You cannot assign the same ADOM to multiple administrators

Correct Answer: AB

"FortiGate units in the ADOM will query their own configuration every 5 seconds. If there has been a configuration change, the FortiGate unit will send a diff revision on the change to the FortiManager using the FGFM protocol."

QUESTION 2

An administrator is replacing a device on FortiManager by running the following command:

```
execute device replace sn .
```

What device name and serial number must the administrator use?

- A. Device name and serial number of the original device.

- B. Device name and serial number of the replacement device.
- C. Device name of the replacement device and serial number of the original device.
- D. Device name of the original device and serial number of the replacement device.

Correct Answer: D

QUESTION 3

Which of the following statements are true regarding schedule backup of FortiManager? (Choose two.)

- A. Backs up all devices and the FortiGuard database.
- B. Does not back up firmware images saved on FortiManager
- C. Supports FTP, SCP, and SFTP
- D. Can be configured from the CLI and GUI

Correct Answer: BC

QUESTION 4

When installation is performed from the FortiManager, what is the recovery logic used between FortiManager and FortiGate for an FGFM tunnel?

- A. After 15 minutes, FortiGate will unset all CLI commands that were part of the installation that caused the tunnel to go down.
- B. FortiManager will revert and install a previous configuration revision on the managed FortiGate.
- C. FortiGate will reject the CLI commands that will cause the tunnel to go down.
- D. FortiManager will not push the CLI commands as a part of the installation that will cause the tunnel to go down.

Correct Answer: A

QUESTION 5

What configuration setting for FortiGate is part of a device-level database on FortiManager?

- A. VIP and IP Pools
- B. Firewall policies

C. Security profiles

D. Routing

Correct Answer: D
