**QUESTION 1**

Which two statements about Security Fabric integration with FortiManager are true? (Choose two.)

A. The Security Fabric license, group name and password are required for the FortiManager Security Fabric integration

B. The Fabric View module enables you to generate the Security Fabric ratings for Security Fabric devices

C. The Security Fabric settings are part of the device level settings

D. The Fabric View module enables you to view the Security Fabric ratings for Security Fabric devices

Correct Answer: CD

**QUESTION 2**

What does a policy package status of Modified indicate?

A. FortiManager is unable to determine the policy package status

B. The policy package was never imported after a device was registered on FortiManager

C. The Policy configuration has been changed on a managed device and changes have not yet been imported into FortiManager

D. The Policy package configuration has been changed on FortiManager and changes have not yet been installed on the managed device.

Correct Answer: D

Reference: http://help.fortinet.com/fmgr/50hlp/56/5-6-1/FortiManager_Admin_Guide/1200_Policy%20and% 20Objects/0800_Managing%20policy%20packages/2200_Policy%20Package%20Installation% 20targets.htm

**QUESTION 3**

Refer to the exhibit.

```
FortiManager # diagnose dvm device list
--- There are currently 1 devices/vdoms managed ---

TYPE             OID    SN        HA    IP                    NAME
fmg/faz enabled  157    FGVM01..  -     10.200.1.1            Local-FortiGate
                        |- STATUS: dev-db: modified; conf: in sync; cond: pendi

                        |- vdom:[3]root flags:0 adom:My_ADOM pkg:[imported]Loca
```

Which two statements about the output are true? (Choose two.)

A. The latest revision history for the managed FortiGate does match with the FortiGate running configuration

B. Configuration changes have been installed to FortiGate and represents FortiGate configuration has been changed

C. The latest history for the managed FortiGate does not match with the device-level database

D. Configuration changes directly made on the FortiGate have been automatically updated to device-level database

Correct Answer: AC

STATUS: dev-db: modified; conf: in sync; cond: pending; dm: retrieved; conn: up-dev-db: modified - This is the device setting status which indicates that configuration changes were made on FortiManager.- conf: in sync - This is the sync status which shows that the latest revision history is in sync with Fortigate\\'s configuration.- cond: pending - This is the configuration status which says that configuration changes need to be installed. Most probably a retrieve was done in the past (dm: retrieved) updating the revision history DB (conf: in sync) and FortiManager device level DB, now there is a new modification on FortiManager device level DB (dev-db: modified) which wasn\\'t installed to FortiGate (cond: pending), hence; revision history DB is not aware of that modification and doesn\\'t match device DB. Conclusion:- Revision DB does match FortiGate.- No changes were installed to FortiGate yet.- Device DB doesn\\'t match Revision DB.- No changes were done on FortiGate (auto-update) but configuration was retrieved instead After an Auto-Update or Retrieve:device database = latest revision = FGT Then after a manual change on FMG end (but no install yet):latest revision = FGT (still) but now device database has been modified (is different). After reverting to a previous revision in revision history:device database = reverted revision != FGT

**QUESTION 4**

What is the purpose of ADOM revisions?

A. To create System Checkpoints for the FortiManager configuration.

B. To save the current state of the whole ADOM.

C. To save the current state of all policy packages and objects for an ADOM.

D. To revert individual policy packages and device-level settings for a managed FortiGate by reverting to a specific ADOM revision

Correct Answer: C

Fortimanager 6.4 Study guide page 198

---

**QUESTION 5**

Refer to the exhibit.

Start to import config from device(Local-FortiGate) vdom(root) to adom(My_ADOM), package(Local-FortiGate_root)

"firewall service category",SKIPPED,"(name=General, oid=697, DUPLICATE)"

"firewall address",SUCCESS,"(name=LOCAL_SUBNET, oid=684, new object)"

"firewall service custom",SUCCESS,"(name=ALL, oid=863, update previous object)"

"firewall policy",SUCCESS,"(name=1, oid = 1090, new object)"

Which statement about the object named ALL is true?

A. FortiManager updated the object ALL using the FortiGate value in its database.

B. FortiManager installed the object ALL with the updated value.

C. FortiManager created the object ALL as a unique entity in its database, which can be only used by this managed FortiGate.

D. FortiManager updated the object ALL using the FortiManager value in its database.

Correct Answer: A
