QUESTION 1

By default, if more than 20 hosts are seen connected on a single port simultaneously, what will happen to the port?

- A. The port is added to the Forced Registration group.
- B. The port is disabled.
- C. The port is switched into the Dead-End VLAN.
- D. The port becomes a threshold uplink.

Correct Answer: B

QUESTION 2

With enforcement for network access policies and at-risk hosts enabled, what will happen if a host matches a network access policy and has a state of "at risk"?

- A. The host is provisioned based on the network access policy.
- B. The host is provisioned based on the default access defined by the point of connection.
- C. The host is isolated.
- D. The host is administratively disabled.

Correct Answer: A

QUESTION 3

Which system group will force at-risk hosts into the quarantine network, based on point of connection?

- A. Forced Quarantine
- B. Forced Remediation
- C. Forced Isolation
- D. Physical Address Filtering

Correct Answer: B

A remediation plan is established, including a forensic analysis and a reload of the system. Also, users are forced to change their passwords as the system held local user accounts.

QUESTION 4

What would happen if a port was placed in both the Forced Registration and the Forced Remediation port groups?

- A. Both enforcement groups cannot contain the same port.
- B. Only at-risk hosts would be impacted.
- C. Only rogue hosts would be impacted.
- D. Both types of enforcement would be applied.

Correct Answer: A

QUESTION 5

Where do you look to determine when and why the FortiNAC made an automated network access change?

- A. The Admin Auditing view
- B. The Event view
- C. The Connections view
- D. The Port Changes view

Correct Answer: B
