QUESTION 1

Which is the best way for custom applications to get information at runtime about the data model of a P8 system?

A. Read the repository database schema and mapping the table and column names to classes and properties.

B. Use P8 APIs to examine metadata objects like Class Descriptions and Property Descriptions.

C. Study IBM FileNet product documentation along with custom application functional specifications.

D. Use IBM InfoSphere Master Data Management tools to discover relationships and data types.

Correct Answer: B

QUESTION 2

While implementing a FileNet P8 solution, you would like to make content addition to the FileNet ECM repository easy, intuitive and productive to end users. The proposed solution should address requirements such as allow documents of a specific type to be added to a given folder, hide certain properties from the user when entering metadata for the document, and apply pre-configured security to documents. Which of the following techniques best addresses these requirements?

A. Use a Form Policy Document.

B. Use the default Add Document functionality provided in the IBM Content Navigator.

C. Use a Search Template.

D. Use a Document Entry Template.

Correct Answer: D

QUESTION 3

Which of the following is NOT true about authentication for P8 custom applications?

A. Kerberos is available with the CE .NET API.

B. The CE Java API with CEWS transports unencrypted credentials. For protection, an encrypted connection using TLS/SSL should be used.

C. Kerberos is available with the CE Java API when using CEWS transport.

D. The CE Java API with EJB transport does not know or care what form of authentication was actually used as long as it is trusted by the CE application server

Correct Answer: C

QUESTION 4

A business process application package usually contains Content Engine artifacts, Process Engine

artifacts, non-FileNet artifacts and instructions for how to import and deploy them.

What else might it contain?

A. Content Search Indexes

B. Workflow data

C. Export Manifest

D. Process configuration export

Correct Answer: D

QUESTION 5

Where is the application server logs located in a typical IBM WebSphere CPE installation?

A. install_root/profiles//logs/

B.
