QUESTION 1

InfoSphere BigInsights offers the following benefits to your organization, EXCEPT:

- A. It cuts costs by providing an efficient compression algorithm based on row level compression using a dictionary to store repetitive patterns.
- B. It complements your existing infrastructure by extending your data collection and analysis capabilities.
- C. It integrates data from a variety of structured and unstructured sources.
- D. It enables analysis at scale.

Correct Answer: A

QUESTION 2

Which of the following options is CORRECT in regards of Text Analytics component?

- A. The Text Analytics component extracts information from unstructured and semi-structured data. By using its components, enterprises can analyze large volumes of text and produce annotated documents that provide valuable insights into unconventionally stored data.
- B. The Text Analytics component only extracts information from structured data stored in a relational database.
- C. The Text Analytics component is a programming model for processing large data sets, and the name of an implementation of the model by Google. Text Analytics is typically used to do distributed computing on clusters of computers.
- D. Jaql is the language for developing text analytics extractors in the InfoSphere BigInsights Text Analytics system. A Jaql extractor is a program written in Jaql that extracts structured information from unstructured or semi-structured text.

Correct Answer: A

QUESTION 3

Which of the following options is CORRECT?

- A. InfoSphere BigInsights is based on a branched Hadoop distribution, and therefore backwards compatibility is not guaranteed.
- B. InfoSphere BigInsights is a distributed file system used as base for Hadoop distributions.
- C. InfoSphere BigInsights is based on the non forked core Hadoop distribution, but backwards compatibility with the Apache Hadoop project is not guaranteed, therefore applications written for Hadoop might not run on BigInsights.
- D. InfoSphere BigInsights is based on the non forked core Hadoop distribution, and backwards compatibility with the Apache Hadoop project will always be maintained. Therefore, all applications written for Hadoop will run on BigInsights.

Correct Answer: D

QUESTION 4

InfoSphere BigInsights supports the following types of authentication, EXCEPT:

- A. Kerberos authentication
- B. LDAP authentication
- C. PAM authentication.
- D. Flat File.

Correct Answer: A

QUESTION 5

How do existing applications usually connect to InfoSphere BigInsights using the Big SQL feature?

- A. Applications will connect using custom made connectors programmed in SPL.
- B. Applications will connect using standard JDBC and ODBC drivers that come with InfoSphere BigInsights.
- C. Applications will connect using the JAQL programming language.
- D. Applications will connect using either HiveQL or Pig programming languages.

Correct Answer: B
