QUESTION 1

The GDPR refers to the principles of proportionality and subsidiarity. What is the meaning of subsidiarity in this context?

- A. Personal data may only be processed when there are no other means to achieve the purposes.
- B. Personal data cannot be reused without explicit and informed consent.
- C. Personal data can only be processed in accordance with the purpose specification.
- D. Personal data must be adequate, relevant and not excessive in relation to the purposes.

Correct Answer: A

Personal data can only be processed in accordance with the purpose specification. Incorrect. This is one of the legal limitations.

Personal data cannot be reused without explicit and informed consent. Incorrect. This is one of the legal limitations.

Personal data may only be processed when there are no other means to achieve the purposes. Correct. This is the definition of subsidiarity. (Literature: A, Chapter 3; GDPR Article 35(7))

Personal data must be adequate, relevant and not excessive in relation to the purposes. Incorrect. This is the definition of proportionality.

QUESTION 2

How is Data Lifecycle Management (DLM) related to data protection?

- A. The DLM makes it possible to create a profile of the data subject.
- B. DLM manages the data flow throughout its life cycle.
- C. DLM makes it possible to know the risks and plans how to mitigate them.

Correct Answer: B

It aims to manage the flow of data throughout the life cycle, from collection, processing, sharing, storage and deletion.

Having the knowledge where the data travels, who is responsible, who has access, helps and a lot to implement security measures.

QUESTION 3

An architect, leaving a building site, puts his laptop for a moment beside his car on the road, while answering his phone. When driving away he sees in the mirror his laptop being crushed by an enormous lorry driving over it. All his files on the design of the building and the calculations he worked on are lost. His only consolation is that those were the only files on the device.

In terms of the GDPR, what happened?

- A. a data breach
- B. a security incident
- C. a security issue
- D. a vulnerability

Correct Answer: B

QUESTION 4

What is the purpose of Data Life Cycle Management (DLM)?

- A. Ensuring that an adequate level of data protection is in place during some of the stages in the data life cycle.
- B. Guaranteeing that personal data is processed in compliance with the GDPR during its lifetime.
- C. Managing personal data in a way that guarantees the data is accurate and kept up to date.

Correct Answer: B

QUESTION 5

According to the GDPR, for which situations should a Data Protection Impact Assessment (DPIA) be conducted?

- A. For all projects that include technologies or processes that require data protection
- B. For all sets of similar processing operations with comparable risks
- C. For any situation where technologies and processes will be subject to a risk assessment
- D. For technologies and processes that are likely to result in a high risk to the rights of data subjects

Correct Answer: A
