QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers.

The chatbot must determine the group a customer belongs to based on their age. The age groups are:

0 - 17

18 - 25

26 - 35

36 - 55

55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group.

Solution: Use multiple choice for Identify in the question and create options that represent of the age groups.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 5

You are creating tables for use with Microsoft Power Platform components.

The display names of the tables must not be changed when the solution is promoted to the user acceptance testing environment.

You need to apply this restriction to the solution.

Where should you make the changes?

A. Segmented solution

B. Default solution

C. Power Apps

D. Unmanaged solution

E. Managed solution

Correct Answer: A

Use solution segmentation so that you only include entity components that are updated when you distribute solution updates. With solution segmentation, you export solution updates with selected entity assets, such as entity fields, forms, and views, rather than entire entities with all the assets.
