## QUESTION 1

You need to configure the RailStatusUpdater cloud flow. What should you do?

- A. Create a JavaScript function to update the run mode values of each action within the desktop flow.
- B. Create an environment variable. Update each desktop flow action to read the variable.
- C. Manually update each desktop flow action to change the run mode.
- D. Create a desktop flow to update the run mode values of each action within the cloud flow.

Correct Answer: B

According to the scenario, you want to run the desktop flow actions in unattended mode when the cloud flow is triggered by a schedule, and in attended mode when the cloud flow is triggered manually. To achieve this, you can create an environment variable that stores the run mode value (attended or unattended) and use it as an input for each desktop flow action. This way, you can change the run mode value dynamically without having to manually update each action.

---

## QUESTION 2

### HOTSPOT

You are developing a cloud flow.

The flow must be able to query several Azure endpoints and must use standard actions where possible.

You need to configure the flow.

Which actions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Action
Issue POST requests to the Microsoft Graph API by using application permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue GET requests to the Microsoft Graph API by using delegated permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue POST requests to Office 365 Management APIs by using delegated permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue GET requests to the SharePoint REST API by using delegated permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request
Issue POST requests to SharePoint REST API by using application permissions.	HTTP HTTP with Azure AD Send an HTTP request to SharePoint Office 365 groups send an HTTP request

Correct Answer:

Requirement	Action
Issue POST requests to the Microsoft Graph API by using application permissions.	<ul style="list-style-type: none"> <li>HTTP</li> <li>HTTP with Azure AD</li> <li>Send an HTTP request to SharePoint</li> <li>Office 365 groups send an HTTP request</li> </ul>
Issue GET requests to the Microsoft Graph API by using delegated permissions.	<ul style="list-style-type: none"> <li>HTTP</li> <li>HTTP with Azure AD</li> <li>Send an HTTP request to SharePoint</li> <li>Office 365 groups send an HTTP request</li> </ul>
Issue POST requests to Office 365 Management APIs by using delegated permissions.	<ul style="list-style-type: none"> <li>HTTP</li> <li>HTTP with Azure AD</li> <li>Send an HTTP request to SharePoint</li> <li>Office 365 groups send an HTTP request</li> </ul>
Issue GET requests to the SharePoint REST API by using delegated permissions.	<ul style="list-style-type: none"> <li>HTTP</li> <li>HTTP with Azure AD</li> <li>Send an HTTP request to SharePoint</li> <li>Office 365 groups send an HTTP request</li> </ul>
Issue POST requests to SharePoint REST API by using application permissions.	<ul style="list-style-type: none"> <li>HTTP</li> <li>HTTP with Azure AD</li> <li>Send an HTTP request to SharePoint</li> <li>Office 365 groups send an HTTP request</li> </ul>

**QUESTION 3**

You are developing a solution for a medical practice. The solution must use an artificial intelligence (AI) model to evaluate medical X-ray images and detect broken bones.

You need to create the AI model for the solution.

Solution: Use Visual Studio to create the model.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

**QUESTION 4**

**HOTSPOT**

You are developing automation solutions for a company.

You need to select the components to use for each scenario. You must minimize development efforts. Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Scenario	Component
Query items from a SharePoint list.	<ul style="list-style-type: none"> <li>Built-in connector</li> <li>Custom connector</li> <li>HTTP connector</li> <li>Azure API Management</li> </ul>
Share methods from a third-party REST API with an organization.	<ul style="list-style-type: none"> <li>Built-in connector</li> <li>Custom connector</li> <li>HTTP connector</li> <li>Browser automation</li> </ul>
Call a Microsoft Graph API endpoint using application permissions.	<ul style="list-style-type: none"> <li>Built-in connector</li> <li>Custom connector</li> <li>HTTP connector</li> <li>Azure API Management</li> </ul>

Correct Answer:

Scenario	Component
Query items from a SharePoint list.	<ul style="list-style-type: none"><li>Built-in connector</li><li>Custom connector</li><li>HTTP connector</li><li>Azure API Management</li></ul>
Share methods from a third-party REST API with an organization.	<ul style="list-style-type: none"><li>Built-in connector</li><li>Custom connector</li><li>HTTP connector</li><li>Browser automation</li></ul>
Call a Microsoft Graph API endpoint using application permissions.	<ul style="list-style-type: none"><li>Built-in connector</li><li>Custom connector</li><li>HTTP connector</li><li>Azure API Management</li></ul>

**QUESTION 5**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a cloud flow that will use two Update Row actions to interact with Microsoft Dataverse. Neither of these actions are dependent on each other.

You must minimize the amount of processing time require to complete the flow.

You need to implement the actions in the cloud flow.

Solution: Create a parallel branch for the two Update Row actions.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A
