QUESTION 1

HOTSPOT

You are developing a cloud flow.

The flow must be able to query several Azure endpoints and must use standard actions where possible.

You need to configure the flow.

Which actions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement	Action
Issue POST requests to the Microsoft Graph API by using application permissions.	<input type="checkbox"/> HTTP <input type="checkbox"/> HTTP with Azure AD <input type="checkbox"/> Send an HTTP request to SharePoint <input type="checkbox"/> Office 365 groups send an HTTP request
Issue GET requests to the Microsoft Graph API by using delegated permissions.	<input type="checkbox"/> HTTP <input type="checkbox"/> HTTP with Azure AD <input type="checkbox"/> Send an HTTP request to SharePoint <input type="checkbox"/> Office 365 groups send an HTTP request
Issue GET requests to the SharePoint REST API by using delegated permissions.	<input type="checkbox"/> HTTP <input type="checkbox"/> HTTP with Azure AD <input type="checkbox"/> Send an HTTP request to SharePoint <input type="checkbox"/> Office 365 groups send an HTTP request
Issue GET requests to the SharePoint REST API by using delegated permissions.	<input type="checkbox"/> HTTP <input type="checkbox"/> HTTP with Azure AD <input type="checkbox"/> Send an HTTP request to SharePoint <input type="checkbox"/> Office 365 groups send an HTTP request
Issue POST requests to SharePoint REST API by using application permissions.	<input type="checkbox"/> HTTP <input type="checkbox"/> HTTP with Azure AD <input type="checkbox"/> Send an HTTP request to SharePoint <input type="checkbox"/> Office 365 groups send an HTTP request

Correct Answer:

Requirement	Action
Issue POST requests to the Microsoft Graph API by using application permissions.	<ul style="list-style-type: none">HTTPHTTP with Azure ADSend an HTTP request to SharePointOffice 365 groups send an HTTP request
Issue GET requests to the Microsoft Graph API by using delegated permissions.	<ul style="list-style-type: none">HTTPHTTP with Azure ADSend an HTTP request to SharePointOffice 365 groups send an HTTP request
Issue GET requests to the SharePoint REST API by using delegated permissions.	<ul style="list-style-type: none">HTTPHTTP with Azure ADSend an HTTP request to SharePointOffice 365 groups send an HTTP request
Issue GET requests to the SharePoint REST API by using delegated permissions.	<ul style="list-style-type: none">HTTPHTTP with Azure ADSend an HTTP request to SharePointOffice 365 groups send an HTTP request
Issue POST requests to SharePoint REST API by using application permissions.	<ul style="list-style-type: none">HTTPHTTP with Azure ADSend an HTTP request to SharePointOffice 365 groups send an HTTP request

QUESTION 2

You create a custom connector that retrieves data from an API.

The host URL of the API requires a connection with a dynamic subdirectory path.

You need to ensure the custom connector's requests are completed successfully.

Which two features should you use? Each correct answer presents a part of the solution.

NOTE: Each correct selection is worth one point.

- A. Use references
- B. Define a base URL
- C. Define a policy
- D. Use custom code

Correct Answer: AB

QUESTION 3

You develop automation solutions for a company.

When a new record is added to a Microsoft Dataverse table, the solution must add the contents of the record to a Microsoft Word Online (Business) template. The solution must convert the template to a PDF document and email the PDF

document to a stakeholder.

You need to design the solution.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Use the Convert Word Document to PDF and Send an email actions in a cloud flow.
- B. Use the Convert Word Document to PDF and Send an email actions in a desktop flow.
- C. Use the Populate a Microsoft Word Online (Business) template action in a desktop flow.
- D. Use the Populate a Microsoft Word Online (Business) template action in a cloud flow.
- E. Create a cloud flow that uses the When a row is added or modified trigger in Microsoft Dataverse.

Correct Answer: ADE

QUESTION 4

You need to configure the flow for processing invoices that arrive in the AP mailbox.

Which three elements should you use?

Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Document type
- B. Location
- C. Pages
- D. AI model
- E. Form type
- F. Form

Correct Answer: ACD

When you add a Predict action to cloud flow, you can configure the Model, Document type, Document, and Pages. Location is not a property.

QUESTION 5

You need to implement security to resolve the invoice data issue

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Clear the Create and Delete permissions. Set the Read permission and Write permission values to Organization.
- B. Select the Finance role, select Custom Entities and navigate to the table.
- C. In Microsoft Power Platform admin center, navigate to the Users section.
- D. In Microsoft Power Platform admin center, navigate to the Security roles section.
- E. Clear the Create and Delete permissions. Set the Read permission and Write permission values to Business unit.
- F. Select the Finance role select Core Records, and then navigate to the table.

Correct Answer: BDE

To implement security to resolve the invoice data issue, you need to perform three actions:

1.

In Microsoft Power Platform admin center, navigate to the Security roles section. This is where you can manage the security roles for your environment and assign them to users or teams.

2.

Select the Finance role, select Custom Entities and navigate to the table. This is where you can configure the access level for each entity in your environment based on your security role.

3.

Clear the Create and Delete permissions. Set the Read permission and Write permission values to Business unit. This will restrict users with this role from creating or deleting records in this table, but allow them to read or write records within their business unit.
