QUESTION 1

An administrator has a critical group of systems running Windows XP SP3 that cannot be upgraded. The administrator wants to evaluate the ability of Traps to protect these systems and the word processing applications running on them.

How should an administrator perform this evaluation?

- A. Run a known 2015 flash exploit on a Windows XP SP3 VM, and run an exploitation tool that acts as a listener. Use the results to demonstrate Traps capabilities.
- B. Run word processing exploits in a Windows 7 VM in a controlled and isolated environment. Document indicators of compromise and compare to Traps protection capabilities.
- C. Prepare a Windows 7 VM. Gather information about the word processing applications, determine if some of them are vulnerable, and prepare a working exploit for at least one of them. Execute with an exploitation tool.
- D. Gather information about the word processing applications and run them on a Windows XP SP3 VM. Determine if any of the applications are vulnerable and run the exploit with an exploitation tool.

Correct Answer: A

QUESTION 2

Once an administrator has successfully instated a Content Update, how is the Content Update applied to endpoint?

- A. After Installation on the ESM, an Agent License renewal is required in order to trigger relevant updates.
- B. After installation on the ESM, relevant updates occur at the next Heartbeat communication from each endpoint.
- C. Installation of a Content Update triggers a proactive push of the update by the ESM server to all endpoints with licensed Traps Agents within the Domain.
- D. The Traps Agent must be reinstalled on the endpoint in order to apply the content update. Existing Agents will not be able to take advantage of content updates.

Correct Answer: B

QUESTION 3

A company wants to implement a new Virtual Desktop Infrastructure (VDI) in which the endpoints are protected with Traps. It must select a VDI platform that is supported by Palo Alto Networks for Traps use. Which two platform are supported? (Choose two.)

- A. Citrix XenDesktop
- B. VMware Horizon View
- C. Listeq

D. Nimboxx

Correct Answer: AB

QUESTION 4

An administrator is testing an exploit that is expected to be blocked by the JIT Mitigation EPM protecting the viewer application in use. No prevention occurs, and the attack is successful. In which two ways can the administrator determine the reason for the missed prevention? (Choose two.)

- A. Check in the HKLM\SYSTEM\Cyvera\Policy registry key and subkeys whether JIT Mitigation is enabled for this application
- B. Check if a Just-In-Time debugger is installed on the system
- C. Check that the Traps libraries are injected into the application
- D. Check that all JIT Mitigation functions are enabled in the HKLM\SYSTEM\Cyvera\Policy\Organization\Process\Default registry key

Correct Answer: AC

QUESTION 5

Which software category is most likely to cause a conflict with the Traps agent?

- A. Exploit prevention software
- B. Web browser software
- C. Web meeting and collaboration software
- D. Full disk encryption software

Correct Answer: A
