QUESTION 1

Which architecture is unique to Palo Alto Networks and results in no additional performance overhead when enabling additional features?

- A. multi-pass
- B. multiple-core threaded
- C. single-pass
- D. no-pass

Correct Answer: C

QUESTION 2

Which Next-Generation Firewall (NGFW) deployment model allows an organization to monitor traffic during evaluations without interruption to network traffic?

- A. Layer 2
- B. TAP mode
- C. virtual wire
- D. Layer 3

Correct Answer: B

QUESTION 3

In which two of the following scenarios is personal data excluded from protection under the General Data Protection Regulation (GDPR)?

Select 2 Correct Responses

- A. The data was automated as part of an information filing system.
- B. The data was generated in the course of a purely personal or household activity.
- C. The data will be used for the prevention of criminal offenses.
- D. The data is related to a person's economic or cultural identity.

Correct Answer: AC

QUESTION 4

Which of the following statements applies to WildFire Public Cloud verdicts?

- A. They are unique to the affected Next-Generation Firewall (NGFW).
- B. They are shared globally with all WildFire customers.
- C. They must be manually downloaded from the WildFire portal.
- D. They are automatically shared with third-party firewall vendors.

Correct Answer: B

QUESTION 5

How does Cloud Identity Engine (CIE) simplify deployment of cloudbased services to provide user authentication?

- A. It allows configuration of an authentication source once instead of for each authentication method.
- B. It expands the capability to filter and forward decrypted and non-decrypted Transport Layer Security (TLS) traffic.
- C. It ensures that a compromised master key does not compromise the configuration encryption for an entire deployment.
- D. It authenticates users via a cloud-based service and refers to the hub for mappings for group identification.

Correct Answer: D
