QUESTION 1

When implementing a wireless LAN, what is the area covered by an AP and usable by a client station called?

- A. Basic Service Area
- B. Independent Basic Service Set
- C. Infrastructure Basic Service Set
- D. Service Set Identifier
- E. Basic Service Set Identifier

Correct Answer: A

QUESTION 2

After successfully connecting to the Wi-Fi network in your hotel room, you launch a web browser on your laptop. Instead of opening your homepage, it directs you to a hotel- branded page that asks for your name, room number, and a secret key. What has most likely happened?

- A. You are the victim of a phishing attack, should not provide the information, and should call the front desk for help.
- B. Every room in the hotel has its own access point, and entering the room number and key confirms connectivity to the correct AP.
- C. The access point is out of connections and you must enter your room number and code to be added to the hotel's Access Request Queue (ARQ) to obtain the next available connection.
- D. The hotel is using a captive portal to provide guest connectivity while keeping non-guest users off the wireless network.

Correct Answer: D

QUESTION 3

What symptom would indicate the presence of a hidden node in a Wi-Fi network?

- A. An increase in encrypted packets
- B. An increase in antenna diversity
- C. An increase in signal leakage
- D. An increase in retransmissions

Correct Answer: D

QUESTION 4

As a general rule, where is the most appropriate location to install a dipole antenna?

- A. Near the center of the coverage area
- B. At one end of the coverage area facing toward the other side
- C. At the perimeter of the coverage area facing inward
- D. At the perimeter of the coverage area facing outward
- E. Directly below the coverage area

Correct Answer: A

QUESTION 5

Which statement best defines SNR?

- A. The difference between the noise floor and a signal's strength
- B. The technology used to detect objects using RF waves
- C. The absolute measurement of signal strength at the receiver
- D. The frequency of the RF signal compared to that of an interferer

Correct Answer: A
