QUESTION 1

ABC Company is comprised of four departments: sales, marketing, engineering, and accounting. The company would like to separate the users on the WLAN so that users from different departments have access to different services on the network. To implement this strategy, you recommend a WLAN controller that supports _____.

- A. Role Based Access Control (RBAC)
- B. Preshared Key (PSK)
- C. Extended Service Set Identifiers (ESSIDs)
- D. Multiple Input Multiple Output (MIMO)
- E. Wireless Intrusion Protection System (WIPS)

Correct Answer: A

QUESTION 2

As an alternative to using leased lines to connect two offices on the same campus, your customer wants to implement a Wi-Fi solution. When asked by your customer, what advantages do you cite regarding use of a Wi-Fi infrastructure instead of a leased line? (Choose 2)

- A. Wi-Fi implementations are more reliable than leased lines.
- B. Wi-Fi implementations have a lower total cost of ownership than leased lines.
- C. Wi-Fi implementations are not susceptible to outages caused by inclement weather.
- D. Wi-Fi implementations support larger numbers of simultaneous connections than leased lines.
- E. Wi-Fi implementations offer more flexibility and easier expansion than leased lines.

Correct Answer: BE

QUESTION 3

A WLAN bridge is best-suited for which scenario?

- A. Connecting a lightweight access point to a WLAN controller
- B. Extending the range of an autonomous access point
- C. Connecting a portable classroom to a school network
- D. Connecting a small group of wired users to an access point
- E. Linking a cash register to a workgroup bridge

Correct Answer: C

QUESTION 4

Given: Several users are required to transfer files among themselves in a conference room. No APs are available for connections to the network infrastructure. All users have laptops with 802.11 wireless adapters installed and operational. What can you implement to allow users to transfer files when 802.11 adapters are available, but no wireless LAN infrastructure is accessible?

- A. ESS
- B. BSS
- C. IBSS
- D. BSSID
- E. SSID

Correct Answer: C

QUESTION 5

The Carrier Sense Multiple Access with Collision Avoidance (CSMA/CA) protocol is necessary in Wi-Fi networks because _____.

- A. RF transmissions can be captured and decrypted without CSMA/CA.
- B. Wi-Fi clients need a standardized method of conserving battery power.
- C. 802.11g and 802.11b transceivers need an interpreter for compatibility.
- D. The wireless transmission medium is half-duplex, thus shared by all users.
- E. Wireless data must be converted to a format that is compatible with Ethernet networks.

Correct Answer: D
