QUESTION 1

A user owns an app that was previously published and wants to delete the app in the hub. The user is NOT able to delete the app.

What could be causing this issue?

- A. The app is open and is being accessed by another user
- B. Published apps can only be deleted from the QMC
- C. The user needs to be assigned the RootAdmin role
- D. The user needs to be assigned the ContentAdmin role

Correct Answer: B

QUESTION 2

A system administrator installs an extension successfully. The system administrator sets up the custom property so the extension can be used without any special permissions granted.

A business analyst can NOT find this extension in the sheet editor. In Audit, the system administrator confirms that the business analyst has full rights.

What is the cause of this issue?

- A. The extension is corrupted
- B. Type used is visualization
- C. The extension is invalid
- D. Type used is mashup

Correct Answer: B

QUESTION 3

A system administrator creates a new content library to give the developers access to images. The system administrator tests the new library in the Qlik Management Console (QMC) by adding an image into a text and image object in an app on the hub. The developers are unable to see the new content library, but can see the default library.

What should the administrator do to make sure the developers have access to the new content library?

- A. Build a security rule to give access to the new content library
- B. Have the users create their own individual content libraries in the QMC

- C. Have the users upload their own images to the app in the hub
- D. Store all required images in the default content library

Correct Answer: A

QUESTION 4

A system administrator has a multi-node Qlik Sense environment with one central node and one rim node. Users report that they see old data in the apps. One data source adds two million rows per day. The time required to complete the reload task increases every day, which causes dependent tasks to miss their schedule.

The system administrator decides to add a rim node.

Which services should run on the rim node?

- A. Engine and Scheduler
- B. Scheduler and Proxy
- C. Engine and Proxy
- D. Dispatcher and Scheduler

Correct Answer: A

QUESTION 5

BASIC

Resource filter

App.Object_*

Actions

- Create
- Read
- Update
- Delete
- Publish
- Change owner

ADVANCED

```
!resource.App.stream.Empty()  
and resource.App.HasPrivilege("read")  
and (  
resource.objectType = "userstate"  
or (  
resource.objectType = "sheet"  
or resource.objectType = "story"  
Conditions or resource.objectType = "bookmark"  
or resource.objectType = "hiddenbookmark"  
or resource.objectType = "snapshot"  
or resource.objectType = "embeddedsnapshot"  
and user.group != "AAACustomer"  
)  
)  
and !user.IsAnonymous()
```

Con Only in hub
text

Refer to the exhibit.

A system administrator creates the security rule shown. No other custom security rules exist.

What effect will the security rule have when applied to a user?

- A. If the user is in AAACustomer group, the user can create app objects in published apps
- B. If the user is NOT in AAACustomer group, the user cannot create sheets
- C. If the user is NOT in AAACustomer group, the user can create app objects in published apps
- D. If the user is NOT in AAACustomer group, the user can create app objects in non-published apps

Correct Answer: A
