**QUESTION 1**

A business analyst has collected the following legal requirement in support of a project seeking to improve the services provided by a children's charity:

The system must record all the details of the children and young people we interact with.

The project is in the early phases of requirements elicitation. At this stage, the business analyst is trying to ensure that they have captured the broad requirements.

Which style of requirements document is the business analyst constructing, and what additional (essential) attribute will they need to record?

- A. Requirements catalogue; owner
- B. Requirements catalogue; requirement ID
- C. Requirements list; business area
- D. Requirements list; source

Correct Answer: B

---

**QUESTION 2**

Isamu is a business analyst working on a project. Unfortunately, it is not progressing as hoped or planned.

He has identified that the main issues with the users on the project are:

- 1) They manage complex processes and they do not seem to be able to articulate their needs.
- 2) They claim they cannot engage in requirements elicitation as they simply do not know what is possible.

Which elicitation technique would best address both these issues?

- A. Activity sampling
- B. Focus group
- C. Prototyping
- D. Scenario analysis

Correct Answer: A

---

**QUESTION 3**

In a requirements catalogue, a distinction is often made between business level and solution level requirements.

Why is this distinction made?

- A. To allow the high-level goals of the solution to be expressed as solution requirements.
- B. To highlight the technical constraints in which the solution requirements must operate.
- C. To reduce the number of functional requirements in the requirements catalogue.
- D. To separate strategic requirements from those that only provide value to the project.

Correct Answer: A

---

#### QUESTION 4

A business analyst working on a project has been informed that changes are required in a particular requirement; she has revisited the requirement set and is unable to determine other requirements that might be impacted by such changes.

Which element of requirements management appears to be missing?

- A. Change control
- B. Requirements cross-referencing
- C. Requirements identification
- D. Requirements origin and ownership

Correct Answer: C

---

#### QUESTION 5

A business analyst has been asked to ensure that all requirements are robust.

The following are potential characteristics of a requirement: A) Consistent B) Functional C) Tacit D) Technical E) Owned F) Relevant

Which of them are characteristics of a requirement that is robust?

- A. A, B and D
- B. A, E and F
- C. B, C and D
- D. C, E and F

Correct Answer: C
