QUESTION 1

Often it is a requirement to wrap a legacy system with a service. This is typically accomplished by encapsulating calls to the legacy system\\'s Application Programming Interface (API) within the core logic of the service. Care must be taken to not expose details of the underlying API through the service contract as it may unintentionally couple the service consumer to the legacy system. Which pair of service-orientation principles directly addresses this concern? Select the correct answer.

A. Service Loose Coupling, Service Abstraction

B. Service Statelessness, Service Autonomy

C. Service Loose Coupling, Service Statelessness

D. Service Autonomy, Standardized Service Contract

Correct Answer: A

QUESTION 2

I built Service Composition A, which is comprised of 4 services. It was very successful in that it fulfilled all of its expected business requirements. I was then assigned a new project that required me to deliver a new service composition called Service Composition B. After studying the new business requirements, I realized that one of the services in Service Composition A could be reused "as is" in Service Composition

B. However, when I tried to make it part of Service Composition B, I ran into a number of problems. In the end, it turned out that even though the service was reusable, it was simply not designed to participate in more than one service composition. Which service-orientation principle would have addressed this issue if I would have applied it to the service prior to completing Service Composition A? Select the correct answer.

A. Service Composability

B. Service Discoverability

C. Service Reusability

D. There is no service-orientation principle that addresses this issue.

Correct Answer: A

QUESTION 3

The _____ principle encourages services within the boundary of a specific service inventory to share messages based on the same data models. This practice directly supports the _____ principle, which is concerned with designing services so that they can be effectively and repeatedly aggregated into different solutions. Select the correct answer.

A. Service Abstraction, Service Autonomy

B. Service Autonomy, Service Composability

C. Standardized Service Contract, Service Composability

D. None of the above.

Correct Answer: C

QUESTION 4

Service-orientation establishes a distinct approach to carrying out a(n) _____. Select the correct answer.

A. separation of concerns

B. identification of constructs

C. inheritance of contracts

D. refactoring of code

Correct Answer: A

QUESTION 5

A company is about to release a service for worldwide usage. As a result, the service contract receives a great deal of attention. After a review it is decided to limit the service contract content to only what is deemed absolutely necessary and to further have the service\\'s Service Level Agreement (SLA) translated into several different languages so that the service can be easily located by those who may want to use it. Which pair of service- orientation principles directly supports these design-time considerations? Select the correct answer.

A. Service Autonomy, Service Reusability

B. Service Statelessness, Standardized Service Contract

C. Service Discoverability, Service Abstraction

D. Service Reusability, Service Statelessness

Correct Answer: C
