## QUESTION 1

You have a Microsoft 365 tenant.

You have a Microsoft SharePoint Online site that contains employment contracts in a folder named EmploymentContracts. All the files in EmploymentContracts are marked as records.

You need to recommend a process to ensure that when a record is updated, the previous version of the record is kept as a version of the updated record.

What should you recommend?

- A. Upload an updated file plan that contains the record definition.
- B. Unlock the record, modify the record, and then lock the record.
- C. Create a copy of the record and enter a version in the file metadata.
- D. Create a new label policy associated to an event that will apply to the record.

Correct Answer: B
