**QUESTION 1**

You have a Microsoft OneDrive for Business folder that contains the files shown in the following table.

Type	Number of files
.jpg	50
.docx	300
.txt	50
.zip	20

In Microsoft Cloud App Security, you create a file policy to automatically apply a classification. What is the effect of applying the policy?

- A. The policy will apply to only the .docx and .txt files. The policy will classify the files within 24 hours.
- B. The policy will apply to all the files. The policy will classify only 100 files daily.
- C. The policy will apply to only the .docx files. The policy will classify only 100 files daily.
- D. The policy will apply to only the .docx and .txt files. The policy will classify the files immediately.

Correct Answer: C

**QUESTION 2****HOTSPOT**

You plan to implement a sensitive information type based on a trainable classifier. The sensitive information type will identify employment contracts.

You need to copy the required files to Microsoft SharePoint Online folders to train the classifier.

What should you use to seed content and test the classifier? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Seed content
Only files that are poor examples of employment contracts
Only files that are good examples of employment contracts
Files that are a mix of good and poor examples of employment contracts
A file that contains the metadata of the employment contracts in the CSV format
A file that contains the metadata of the employment contracts in the JSON format

Testing the classifier
Only files that are poor examples of employment contracts
Only files that are good examples of employment contracts
Files that are a mix of good and poor examples of employment contracts
A file that contains the metadata of the employment contracts in the CSV format
A file that contains the metadata of the employment contracts in the JSON format

Correct Answer:

Seed content
Only files that are poor examples of employment contracts
Only files that are good examples of employment contracts
Files that are a mix of good and poor examples of employment contracts
A file that contains the metadata of the employment contracts in the CSV format
A file that contains the metadata of the employment contracts in the JSON format

Testing the classifier
Only files that are poor examples of employment contracts
Only files that are good examples of employment contracts
Files that are a mix of good and poor examples of employment contracts
A file that contains the metadata of the employment contracts in the CSV format
A file that contains the metadata of the employment contracts in the JSON format

### QUESTION 3

## HOTSPOT

You have a Microsoft 365 E5 subscription that uses data loss prevention (DLP) to protect sensitive information.

You need to create scheduled reports that generate:

1.

DLP policy matches reported over the shortest frequency of time

2.

DLP incidents reported over the longest frequency of time

Which frequency should you configure for each report? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

### Answer Area

DLP policy matches: 

	▼
Daily	
Every two days	
Weekly	
Every two weeks	
Monthly	

DLP incidents: 

	▼
Weekly	
Every two weeks	
Monthly	
Every three months	
Every six months	

Correct Answer:

## Answer Area

DLP policy matches:

	▼
Daily	
Every two days	
Weekly	
Every two weeks	
Monthly	

DLP incidents:

	▼
Weekly	
Every two weeks	
Monthly	
Every three months	
Every six months	

### QUESTION 4

You have a Microsoft 365 tenant.

You discover that email does NOT use Microsoft Office 365 Message Encryption (OME).

You need to ensure that OME can be applied to email.

What should you do first?

- A. Enable Microsoft Defender for Office 365.
- B. Activate Azure Information Protection.
- C. Activate Azure Rights Management (Azure RMS).
- D. Create an Azure key vault.

Correct Answer: C

### QUESTION 5

## HOTSPOT

You have a Microsoft 365 subscription. Auditing is enabled.

A user named User1 is a member of a dynamic security group named Group1.

You discover that User1 is no longer a member of Group1.

You need to search the audit log to identify why User1 was removed from Group1.

Which two activities should you use in the search? To answer, select the appropriate activities in the answer area.
