QUESTION 1

Cloud Kicks needs to provide implicit record access to users.

Which two options will help Cloud Kicks achieve this goal? (Choose two.)

- A. Access to related leads for the owner of the parent campaign
- B. Read-only access to parent account for a user, based on a criteria-based sharing rule
- C. Access to child opportunities for the owner of the parent account
- D. Read-only access to the parent account for a user with access to a child case

Correct Answer: CD

QUESTION 2

Universal Containers has selected a small and diverse group of users to review inactive accounts. Given the Private sharing model, a public group was created and made available to this group of users. A sharing rule was created to make inactive Accounts visible to the public group. However some of these users are reporting they don't see any of the Accounts that were shared with the public group. What is the underlying issue for these users?

- A. The users have a permission set that only allow Accounts in "Active" status.
- B. The Accounts are owned by users higher in the role hierarchy.
- C. The users are in profiles that have no access to the Account object.
- D. The page layout assigned to these users is different than the Account owner.

Correct Answer: C

QUESTION 3

Universal Containers (UC) provides shipment tracking for its customers on a custom Shipment object. The total number of shipments made yearly by the customers should be available on the Account record to the Marketing team, but the Marketing team should not have access to Shipment records.

What recommendation should an Architect provide to accomplish this?

- A. Private organization-wide default on Shipment, rollup summary, and Master-Detail relationship to Account.
- B. Controlled by Parent (Account) on Shipment, trigger, and Master-Detail relationship to Account.
- C. Private organization-wide default on Shipment, trigger, and Lookup relationship to Account.
- D. Public organization-wide default on Shipment, process builder, and Lookup relationship to Account.

Correct Answer: C

QUESTION 4

To grant Universal Containers sales manager access to shipment records properly, it was necessary to leverage Apex managed sharing. The IT team is worried about improper access to records. Which two features and best practices should a Salesforce architect recommend to mitigate this risk?

- A. Use runAs system method in test classes to test using different users and profiles.
- B. Use with Sharing keyword in Apex classes to assure record visibility will be followed.
- C. Use isShareable in Apex classes to assure record visibility will be followed.
- D. Use isAccessible keyword in Apex classes to assure record visibility will be followed

Correct Answer: AB

QUESTION 5

Universal Containers has a set of Account Management users that should only see Accounts once the Account becomes a customer. The Type field on the Account identifies whether the Account is a Prospect, Customer, Partner or Other. Which two methods could an Architect use to enable this sharing requirement, assuming a private sharing model for Accounts? Choose 2 answers.

- A. Institute a process that calls for the Account Manager to be added to the Account Team once the Account becomes a customer.
- B. Create an Account Sharing Rule that shares all Accounts owned by Sales to be shared with Account Management roles and subordinates.
- C. Create a Public List View, where Accounts of Type Customer are included and share the List view with the Account Management public group.
- D. Create a Criteria-based Sharing rule that shares the Account to the Account Management Group when the Type is Customer.

Correct Answer: AD
