QUESTION 2

When developing using Sitecore headless SDKs, what is the relationship between the rendering host and the Sitecore Content Delivery role?

- A. The Content Delivery role hosts the headless services that the rendering host uses to retrieve Sitecore content and layout.
- B. The Content Delivery role has absolutely no relation to the rendering host as both are separate features for content management and delivery.
- C. The rendering host is a plugin feature that is loaded into the Content Delivery role to enhance the response speed of page requests.
- D. The rendering host is integrated into the Content Delivery role to make a highly-coupled system for retrieving and displaying content data.

Correct Answer: B

QUESTION 3

When is it possible to edit a field inline with Experience Editor if the component is developed using Sitecore MVC?

- A. When the field is rendered on a page with existing content
- B. When the field is marked as inline editable in its definition
- C. When a Field() helper method is used to render the field
- D. When the field is marked as versioned rather than unversioned

Correct Answer: C

QUESTION 4

What is the purpose of a Sitecore Support Package?

- A. To help Sitecore replicate an issue without needing to access the environment directly.
- B. To let Sitecore Support Services access active logs running directly in the environment.
- C. To make it easier for you to download update packages and install them into your environment.
- D. To give Sitecore direct access to your environment for support purposes.

Correct Answer: A

QUESTION 5

If the path of a specific module file is not set in the sitecore.json file, what will happen when you run standard serialization commands?

- A. When you run push or pull serialization commands, the tool will search for your module to access the includes.
- B. You will receive a warning advising you some modules are not included and ask if you wish to include them in the serialization attempt.

- C. The paths and related items included in the module will not be serialized when you run a push or pull command.
- D. Only selected items in the specific module will be serialized, but it will not include all of them.

Correct Answer: C
