QUESTION 1

For non-SXA websites, why is it recommended to avoid setting presentation details directly on new content items?

- A. Defining presentation details on standard values ensures all the fields related to an item's presentation are configured for access by content creators.
- B. Sitecore does not allow presentation details to be changed at the content-item level, so they must be set and edited from the standard values of templates.
- C. It allows all content items made from the same template to have the same presentation details by default and eliminates additional work during content creation.
- D. It forces a prompt to appear when new content items are created so Content Authors can finalize the presentation details for the new content items.

Correct Answer: C

QUESTION 2

Which statement best describes the purpose of the Sitecore Container Registry (SCR)?

- A. The SCR provides base container images for Sitecore environments for both production and development purposes.
- B. The SCR provides Sitecore-approved images submitted by the Sitecore MVP community.
- C. The SCR only provides base container images for Sitecore environments for development purposes only.
- D. The SCR only provides base container images for add-on modules, such as SXA, JSS, and SPE.

Correct Answer: A

QUESTION 3

When creating data templates, you have the option to add Field sections (at least one is required). What is the purpose of Field sections?

- A. Field sections are used for grouping related fields with templates and the resulting items.
- B. Field sections enable Content Authors to add content to various fields.
- C. Field sections make template items easier to recognize in Sitecore Rocks.
- D. Field sections provide a hierarchical way of navigating fields in the code.

Correct Answer: A

QUESTION 4

You are setting up a Sitecore instance without the use of SXA and want to accommodate three public-facing websites. Where would you map the correct Home item to its corresponding hostname?

- A. In the /system/settings section of the Master database
- B. In the Sitecore Core database's settings file
- C. In the Internet Information Services website definition settings
- D. In a config patch file located in the /App_Config/Include folder

Correct Answer: D

QUESTION 5

You are using Sitecore MVC to develop an area of a company's website that will require the use of Sitecore's Personalization Engine to change the rendering that is displayed to a visitor. What type of component binding will allow the Designer to use personalization to change the component?

- A. Static component binding, because you are able to give Authors the ability to change the presentation of the page.
- B. Static component binding, because you are able to ensure that content rendered in the placeholder is always the same when the component is selected.
- C. Dynamic component binding, because you are able to ensure that the content rendered in the placeholder is always the same.
- D. Dynamic component binding, because you are providing a placeholder to enable flexibility to change the components that make up the presentation of a page.

Correct Answer: D
