QUESTION 1

Which of the following items describe ITSI Deep Dive capabilities? (Choose all that apply.)

- A. Comparing a service's notable events over a time period.
- B. Visualizing one or more Service KPIs values by time.
- C. Examining and comparing alert levels for KPIs in a service over time.
- D. Comparing swim lane values for a slice of time.

Correct Answer: BCD

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/DeepDives>

QUESTION 2

Which of the following describes entities? (Choose all that apply.)

- A. Entities must be IT devices, such as routers and switches, and must be identified by either IP value, host name, or mac address.
- B. An abstract (pseudo/logical) entity can be used to split by for a KPI, although no entity rules or filtering can be used to limit data to a specific service.
- C. Multiple entities can share the same alias value, but must have different role values.
- D. To automatically restrict the KPI to only the entities in a particular service, select "Filter to Entities in Service".

Correct Answer: D

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/KPIfilter>

QUESTION 3

In maintenance mode, which features of KPIs still function?

- A. KPI searches will execute but will be buffered until the maintenance window is over.
- B. KPI searches still run during maintenance mode, but results go to itsi_maintenance_summaryindex.
- C. New KPIs can be created, but existing KPIs are locked.
- D. KPI calculations and threshold settings can be modified.

Correct Answer: A

It's a best practice to schedule maintenance windows with a 15- to 30-minute time buffer before and after you start and

stop your maintenance work. This gives the system an opportunity to catch up with the maintenance state and reduces the chances of ITSI generating false positives during maintenance operations.

QUESTION 4

Which glass table feature can be used to toggle displaying KPI values from more than one service on a single widget?

- A. Service templates.
- B. Service dependencies.
- C. Ad-hoc search.
- D. Service swapping.

Correct Answer: C

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/Visualizations#collapseDesktop8>

QUESTION 5

Which scenario would benefit most by implementing ITSI?

- A. Monitoring of business services functionality.
- B. Monitoring of system hardware.
- C. Monitoring of system process statuses.
- D. Monitoring of retail sales metrics.

Correct Answer: A
