QUESTION 1

What is the likely impact of increasing the Download Insight sensitivity?

A. It would block files that trend towards a poor reputation and decrease false positives.

B. It would allow only files with a good reputation and decrease false positives.

C. It would allow only files that trend toward a good reputation and increases false positives.

D. It would block files that have a poor reputation and decrease false positives.

Correct Answer: C

QUESTION 2

An administrator has defined a rule to allow traffic to and from a specific server by its Fully Qualified Domain Name (FQDN), because the server\\'s IP address varies based on the office in which a client is located. The administrator attempts to verify the rule and finds that the traffic is being blocked. The logs list the IP address of the server instead of its FQDN. What does the administrator need to do within the firewall policy to allow the rule to work correctly?

A. Enable DNS lookup

B. Enable reverses DNS lookup.

C. Disable Smart DNS.

D. Disable NetBIOS Protection

Correct Answer: B

QUESTION 3

A company plans to expand its Symantec Endpoint Protection 12.1 (SEP) infrastructure by creating a second site for use in replication. At a minimum, which two tasks need to be completed to create the second site? (Select two.)

A. A new Symantec Endpoint Protection Manager needs to be installed.

B. A new SEP domain needs to be created.

C. A new SEP database needs to be created.

D. An SEP administrator needs to be given replication rights.

E. A new SEP location needs to be created.

Correct Answer: AC

QUESTION 4

A company has deployed Symantec Endpoint Protection 12.1 in their corporate environment using a multi-site design. If an administrator makes policy changes in the United States site, when will the changes appear in the European site?

A. after the next heartbeat

B. after the next replication interval

C. immediately

D. after the policy changes are saved

Correct Answer: B

QUESTION 5

Employees of an accounting company often take their notebooks to customer sites. The administrator needs to apply a different firewall policy when the notebooks are disconnected from the accounting company\\'s network. What must the administrator configure to use the two different policies?

A. Groups

B. Domains

C. Sites

D. Locations

Correct Answer: B
