QUESTION 1

You are the Test Manager of a new project aimed at developing a software system that must be certified at level B of the DO-178B standard. The project will follow a V-Model software development life cycle and it will have four formal levels of testing: component, integration, system and acceptance testing.

You must produce the test plan documentation for this project by providing an adequate coordination across the four levels of testing in order to assure auditability.

Which of the following answers would you expect to best describe how to organize the test plan?

- A. Produce a single master test plan that covers in detail all four levels, describing the particular activities for all test levels.
- B. Produce a master test plan that covers three levels (component, integration, system test) and a separate acceptance test plan.
- C. Produce a master test plan describing the relationship between the four levels, and four separate detailed level test plans, one for each level.
- D. Produce four separate detailed level test plans, one for each level, without a master test plan.

Correct Answer: C

QUESTION 2

You are not confident with the assessment of the risk level and you suspect that it will be possible to find high-priority bugs in low-risk areas.

Furthermore, the period for test execution is very short. Your goal is to test all the product risks in a risk-based way, while assuring that each product risk gets at least some amount of testing.

Product risk	Risk level	Test Cases
R1	25	T1, T2
R2	12	T3, T4
R3	10	T5, T6
R4	8	T7, T8
R5	2	T9, T10

Which of the following answers describes the best test execution schedule in this scenario?

- A. T1, T2, T3, T4, T5, T6, T7, T8, T9, T10
- B. T1, T3, T5, T7, T9, T2, T4, T6, T8, T10
- C. T10, T9, T8, T7, T6, T5, T4, T3, T2, T1

D. T10, T8, T6, T4, T2, T9, T7, T5, T3, T1

Correct Answer: B

QUESTION 3

Assume you are a Test Manager involved in system testing of a CRM application for a Pay-TV company. Currently the application is able to support a proper number of users assuring the required responsiveness. Since the business is expected to grow, you have been asked to evaluate the ability of the application to grow to support more users while maintaining the same responsiveness.

Which of the following tools would you expect to be the most useful at performing this evaluation?

- A. Coverage tools
- B. Test management tools
- C. Static analysis tools
- D. Performance tools

Correct Answer: D

QUESTION 4

Assume you are managing the system testing execution phase of a project.

The system test execution period for that project is scheduled for eighteen weeks and the release date is scheduled at the end of system testing.

During the sixth week of system test execution, at the staff meeting, the project manager informs you that the project deadlines are changed and the release date that is only three weeks ahead.

This new release will not allow the completion of the system tests. Suppose also that you have followed a risk-driven test approach for this project.

Which of the following statements represents the worst way to lead your test team in the next three weeks?

- A. Neglect your management activities and work side-by-side with your test team executing tests.
- B. Considering the executed tests, you should reduce the test coverage back on the risk analysis and adjust downward the priority of the associated risk items.
- C. Convince all the people of your test team that each of them is an important and needed member, and that their contribution is fundamental to the success of the team.
- D. Favor and encourage a proactive attitude where people ask for new tasks as soon as they finish their current tasks.

Correct Answer: A

QUESTION 5

You are estimating the effort for the integration testing activities of a new project. Consider the following factors, which can affect that estimation:

- I. Availability of re-usable test systems and documentation from previous, similar projects
- II. Unexpected timing of components arrival
- III. Stability of the integration test team (no turnover)
- IV. Many and geographically distributed sub-teams

Which of the following statements is true?

- A. I and II can negatively affect the estimation III and IV usually favor the accuracy of the estimation effort
- B. II and III can negatively affect the estimation I and IV usually favor the accuracy of the estimation effort
- C. II and IV can negatively affect the estimation I and III usually favor the accuracy of the estimation effort
- D. III and IV can negatively affect the estimation I and II usually favor the accuracy of the estimation effort

Correct Answer: C
