**QUESTION 1**

ACME Tools has a vSphere 5.x deployment with an older iSCSI storage array. The administrator is considering adding an additional array, which will include support for the vStorage APIs for Array Integration (VAAI). Which two tasks would be completed in a reduced period of time if the new array was added? (Choose two.)

A. creating VMFS datastores on the new array

B. creating fault tolerant virtual machines on the new array

C. migrating virtual machines using Storage vMotion between the arrays

D. writes to thin provisioned virtual disks on the new array

Correct Answer: BD

**QUESTION 3**

Why would a vSphere administrator configure resource shares for a virtual machine?

A. To prioritize access to a resource during contention

B. To guarantee access to a resource during contention

C. To prioritize access to a resource at all times

D. To guarantee access to a resource at all times

Correct Answer: A

**QUESTION 4**

The oncall system administrator has made a change on the ESXi host requiring a restart of the management network. Lockdown mode is enabled. Which action should the administrator take to restart the management network?

A. Use the vSphere client to enable local authentication services, then logon directly to the ESXi Shell and run services mgmt-vmware restart.

B. Use an SSH client to logon to the command line and run services mgmt-vmware restart.

C. Use the vSphere client to enable the DCUI and then logon to the ESXi Shell and use the menu to restart the management network.

D. Logon directly to the DCUI and use the menu to restart the management network.

Correct Answer: D

**QUESTION 5**

A vSphere administrator determines that more metrics are available for viewing in the realtime view than are available in the daily view for a virtual machine. What is the reason for this discrepancy in the number of available metrics?

A. The daily view does not contain all of the metrics that the realtime view does.

B. The default vCenter statistics level is being used.

C. A vCenter statistics level of 4 is being used.

D. The daily view presents a different selection of metrics by default than presented by the realtime view.

Correct Answer: B
