QUESTION 1

Which vCloud Director resource allows virtual machine network communications, regardless of ESXi host, as well as network communication for Isolated, Routed vApp and Organization Networks?

A. Edge Gateway

B. Network Pool

C. VMware Distributed Switch

D. VMware Standard Switch

Correct Answer: B

QUESTION 2

A new ESXi host has been added to vCAC, but is not visible in the Infrastructure Organizer. What would cause this issue?

A. The ESXi host is not a member of a Provisioning Group.

B. The vCAC Agent is not installed on the ESXi host.

C. The vCD Agent is not installed on the ESXi host.

D. The ESXi host is not a member of an Enterprise Group.

Correct Answer: D

QUESTION 3

Which feature requires an administrator using an RDM to configure it with virtual compatibility mode?

A. vMotion

B. Virtual Machine Snapshots

C. High Availability

D. N-port ID Virtualization

Correct Answer: B

QUESTION 4

An administrator finds a network situation with an isolated vApp as follows:

Virtual machines on the same ESXi host can communicate with each other.

Virtual machines on different ESXi hosts are unable to communicate with each other.

The isolated vApp\\'s guest operating system firewall is turned off.

What should the administrator do to resolve this problem?

A. Allow the specified VLAN on the vSphere Port Group for the Network Pool.

B. Configure the vApp Edge device Firewall to allow traffic.

C. Configure the vApp Edge device NAT to allow traffic.

D. Allow the specified VLAN on the physical switch for the Network Pool.

Correct Answer: D

QUESTION 5

An administrator needs to change the LDAP options for an organization. Which rights must the administrator have to make the change?

A. Organization administrator rights

B. System administrator rights

C. LDAP administrator rights

D. Active Directory rights

Correct Answer: B
