QUESTION 1

An administrator needs to configure an alarm that notifies administrators if an application is impacted by overcommitment of memory resources. The environment consists of 100 virtual machines running on 5 ESXi hosts that are configured in a fully automated HA/DRS cluster. The cluster is configured with a parent resource pool and Production and Development child pools. Where should the administrator set the alarm to meet the requirement?

A. On each virtual machine

B. On each host

C. On the Production resource pool

D. On the cluster

Correct Answer: D

QUESTION 2

A VMFS5 datastore shows several errors, which suggests file system corruption. Which tool could a vSphere administrator use to check the VMFS file system?

A. vSphere On-disk Metadata Analyzer (VOMA)

B. VMware Infrastructure Management Assistant (VIMA)

C. vSphere Storage APIs for Storage Awareness (VASA)

D. VMware vSphere Health Check Analyzer (VHCA)

Correct Answer: A

QUESTION 3

Which statement is true regarding the licensing of vCenter Server?

A. The license for vCenter Server must be provided at the time of installation.

B. Changing the license assigned to vCenter Server requires a restart of the vCenter Server service.

C. Virtual machines can still be powered on if the vCenter Server license expires.

D. Licensing for a single vCenter Server installation is determined by the number of managed virtual machines.

Correct Answer: C

QUESTION 4

Which action should an administrator take to increase the size of a VMFS5 datastore from 2TB to 32TB?

A. Create a second LUN and add a second share for the datastore

B. Dynamically expand the original LUN and increase the size of the datastore

C. Dynamically expand the original LUN and add extents to the datastore

D. Create a second LUN and increase the size of the datastore

Correct Answer: B

QUESTION 5

An administrator is configuring LDAP for a vCloud Director system. What must be configured before Kerberos can be used as the authentication method for LDAP?

A. a Realm

B. a custom LDAP service

C. an OU

D. an SSL Keystore

Correct Answer: A
