QUESTION 1

A database administrator needs to configure Microsoft SQL Server Express for the View Events Database. Which two steps must the database administrator complete? (Choose two.)

- A. Enable Windows Authentication for the user on the database.
- B. Enable SQL Server Authentication for the user on the database.
- C. Determine the port number that is used to access the database server.
- D. Set up the Events database tables.

Correct Answer: BC

QUESTION 2

An administrator is performing the post-installation configuration of Workspace Portal. While running the setup wizard, the administrator receives an error message. The error message appears during configuration of the Directory settings and indicates that the user account cannot be found.

The administrator has confirmed the following:

What is causing the error?

- A. The user account is located below the Base DN.
- B. The user account has not been entered into the Global Catalog.
- C. The user account is located above the Base DN.
- D. The user account name is too long.

Correct Answer: C

QUESTION 3

Which prerequisite must an administrator verify before installing a View Connection server?

- A. Internet Information Services (IIS)
- B. Dynamic IP address
- C. Apache Web Server
- D. Static IP address

Correct Answer: D

QUESTION 4

An administrator needs to create an alarm to monitor when a specific ESXi host in an HA/DRS cluster becomes disconnected from other vSphere components like HA agents or the vCenter server.

Which process must the administrator use to accomplish this?

- A. Define a Host type alarm, monitor for the event Cannot connect host, and supply a conditional trigger on Host name equal to a specific label.
- B. Define a Cluster type alarm, monitor for the event Cannot connect host, and supply a conditional trigger on Host name equal to a specific label.
- C. Define a Cluster type alarm, monitor for the event Host status changed, and supply a specific label for each host.
- D. Define a Host type alarm, monitor for the condition Host status changed, and supply a specific label for each host.

Correct Answer: A

QUESTION 5

A system administrator needs to control the allocation of memory and CPU resources to an organization's Finance team. The vSphere environment is built on a single cluster of ESXi hosts.

Which feature can be used to accomplish this task?

- A. Resource Pool Reservations
- B. DRS set to Fully Automated
- C. Virtual Machine Shares
- D. DRS Virtual Machine Groups

Correct Answer: A
