QUESTION 1

Which two actions must be taken to upgrade an application under Veritas Cluster Server control? (Select two.)

- A. Verify that the application agent supports the new version
- B. Verify that the new version is supported with haagent -verify
- C. Freeze the application service group
- D. Freeze the application resources
- E. Stop the application agent on all systems

Correct Answer: AC

QUESTION 2

Two Process resources named ResourceA and ResourceB are configured in a service group using the command-line interface. ResourceA is configured as a child to ResourceB, and the Critical attribute of ResourceB is modified from the default value.

What is the expected result of shutting down the ResourceB process outside of VCS?

- A. Both ResourceA and ResourceB go offline.
- B. ResourceA is online and ResourceB is restarted.
- C. ResourceB is faulted and the service group fails over.
- D. ResourceB is faulted and ResourceA is online.

Correct Answer: D

QUESTION 3

The GroupA service group is frozen persistent. All of the systems in the cluster were rebooted. What happens to the GroupA service group after all of the systems in the cluster are finished booting and seeded in the cluster?

- A. GroupA starts to ONLINE on all systems in the cluster.
- B. GroupA remains OFFLINE on all systems in the cluster.
- C. GroupA is AUTODISABLE on all systems in the cluster.
- D. GroupA starts to ONLINE on the system listed in its AutoStart list.

Correct Answer: B

QUESTION 4

The amount of information logged on all Process resources needs to be increased in order to debug a problem in a VCS cluster. After running the proper commands to accomplish this, which file is modified?

- A. log.cf
- B. debug.cf
- C. main.cf
- D. types.cf

Correct Answer: D

QUESTION 5

An administrator is configuring another application service in high availability. The application's logical IP address will rely on the same NIC used by the ClusterService service group. Data will be stored on raw devices. Which types of resources should the administrator consider to configure in the service group?

- A. Application, File System, Volume, Disk Group, IP, NIC
- B. Application, Volume, Disk Group, IP, Proxy
- C. Application, File System, Volume, Disk Group, IP, Proxy
- D. Application, Volume, Disk Group, IP, Phantom

Correct Answer: B
