QUESTION 1

Which command starts the NetBackup services on Windows?

- A. The netbackup start command
- B. The start services command
- C. The bp.start_all command
- D. The bpup command
- E. The bpup all command

Correct Answer: D

None of the other commands are valid on a Windows NetBackup host, some are valid on UNIX.

QUESTION 2

An administrator has a master server named master1. When the administrator runs the bpcintcmd -pn command on the client, the administrator receives the following output:

```
bpcintcmd -pn
expecting response from master2
client_01.domain.com client_01 192.168.0.30 3815
```

What is a possible cause for this output?

- A. The host file needs to be changed on the master server.
- B. The client has lost connectivity to the master server.
- C. The SAN connection to the master server needs to be configured.
- D. The bp.conf of the client needs to be updated.

Correct Answer: B

QUESTION 3

Which utility is least helpful when troubleshooting network connectivity issues that exist between a media server and a client?

- A. bptestbpcd
- B. nbdb_ping
- C. bptestnetconn

D. bpcIntcmd

Correct Answer: D

QUESTION 4

After creating a NBU-Catalog type backup policy, an administrator receives the following message:

```
DR file is on the same partition as your catalog and will be unusable in an actual disaster or disk failure.
```

Which two options are available to the administrator to ensure the DR file is available for future use? (Choose two.)

- A. ensure the folder DR file is on a non-root volume.
- B. ensure the DR file is created on a volume other than the NetBackup volume.
- C. ensure the NetBackup catalog is on a non-root volume.
- D. configure a valid email address of the administrator in the "Send email" option.
- E. configure Auto Image Replication to send the DR file to a remote master server.

Correct Answer: BD

QUESTION 5

An administrator notices that backups are failing for clients added to a new backup policy. The backups attempt to run again after 10 minutes.

How can the administrator modify the time between backup attempts?

- A. modify the "Job retry delay" host property
- B. modify the "Policy update interval" host property
- C. modify the "Schedule backup attempts" host property
- D. modify the "Take checkpoints every" value in the backup policy

Correct Answer: C
