QUESTION 1

Which statement describes how Catalog backups can be scheduled?

A. All of the above

B. According to frequency

C. According to calendar

D. After each backup session

Correct Answer: A

NetBackup catalog backups can be schedule as a frequency or calendar-based, as well as after each backup session.

QUESTION 2

Which backup storage is unsupported with media server load balancing?

A. BasicDisk

B. Media Server Deduplication Pool

C. AdvancedDisk

D. Media Manager storage

Correct Answer: A

QUESTION 3

Several clients in the same network experience consistent, short-term network failures. The clients are sending data to a media server using a storage unit group. The network failures are causing job failures.

Which setting reduces the job failures in this situation?

A. the Preferred Network master server host property

B. the Resilient Network master server host property

C. the Failover attribute in a storage unit group

D. the Throttle Bandwidth master server host property

Correct Answer: B

QUESTION 4

An administrator working offsite is required to carry out a major upgrade to a NetBackup appliance. The appliance will need to be rebooted multiple times during the upgrade process.

How should the administrator connect to the appliance to monitor the upgrade progress without interruption?

A. connect to the IPMI interface using a web browser

B. connect to the eth0 interface using a web browser

C. connect to the serial interface remotely using CLISH

D. connect to the eth0 interface using SSH

Correct Answer: A

QUESTION 5

Which statement is true about OpsCenter?

A. OpsCenter is a premium option from NetBackup that must be purchased separately.

B. OpsCenter and OpsCenter Analytics are both 100% free.

C. OpsCenter cannot be used to manage NetBackup versions prior to 7.5.

D. Basic OpsCenter functionality is included with NetBackup (Additional functionality can be added by purchasing the OpsCenter Analytics option).

Correct Answer: D
