QUESTION 1

Which permission roles can be assigned in Veeam Backup Enterprise Manager for delegation of responsibilities? (Choose the 3 appropriate options)

A. Restore Operator

B. db_owner

C. Portal Administrator

D. Power User

E. Portal User

Correct Answer: ABC

QUESTION 2

Which statement regarding Enterprise Manager is true?

A. RESTful API is an optional feature.

B. Only XML format is currently supported for RESTful API for resource representation.

C. Users with Portal User role can access VMs from their restore scope in VMs and/or Files tab and generate reports as permitted by their settings.

D. Restore scope can be customized if you have Enterprise Edition.

E. Users with Restore Operator role can access VMs from their restore scope in VMs and/or Files tab, as well as reports for these VMs; they can also perform restore operations as permitted by their settings.

Correct Answer: A

QUESTION 3

Which statement regarding various product features are true?

A. Veeam Explorer for Sharepoint in Standard Edition only provides limited restore support from Microsoft Hyper-V VMs.

B. It is possible to switch a paid edition to free edition by going to View > Free functionality only from the menu.

C. Backups from Hyper-V will never use storage snapshots - only VM snapshots.

D. Veeam Explorer for Sharepoint in Standard Edition provides full restore support from VMware vSphere VMs.

E. Enterprise Plus edition includes WAN acceleration which can be used for Backup Copy Jobs and Replication Jobs across the WAN.

Correct Answer: D

QUESTION 4

If a VM is restored to its original location via Full VM restore while the original VM still exists, the original VM will be:

A. Renamed automatically

B. Copied to another location specified in the settings

C. Backed up and stored at the same location

D. Deleted

Correct Answer: D

QUESTION 5

Which of the following is correct regarding Direct NFS Access transport mode? (Choose two.)

A. The SCSI hot-add capability of ESXi hosts to attach disks of the backed up VM to the backup proxy VM is used

B. VM data is transferred over the LAN

C. You can select to failover to this mode, if primary transport modes fail or are unavailable

D. Direct NFS mode can be used for restores

Correct Answer: BD
