QUESTION 1

What happens in relation to the CRL cache after a cpstop and cpstart have been initiated?

A. The Gateway retrieves a new CRL on startup, and discards the old CRL as invalid.

B. The Gateway continues to use the old CRL, as long as it is valid.

C. The Gateway continuous to use the old CRL even if it is not valid, until a new CRL is cashed.

D. The Gateway issues a crl_zap on startup, which empties the cache and forces certificate retrieval.

Correct Answer: B

QUESTION 2

What gives administrators more flexibility when configuring Captive Portal instead of LDAP query for Identity Awareness authentication?

A. Captive Portal is more secure than standard LDAP

B. Captive Portal is more transparent to the user

C. Nothing, LDAP query is required when configuring Captive Portal

D. Captive Portal works with both configured users and guests

Correct Answer: D

QUESTION 3

A. Last. It serves a logging function before the implicit drop.

B. Last, it explicitly drops otherwise accepted traffic

C. Before last followed by the Stealth Rule.

D. First, it explicitly accepts otherwise dropped traffic.

Correct Answer: A

QUESTION 6

Where can an administrator specify the notification action to be taken by the firewall in the event that available disk space drops below 15%?

A. Real Time Monitor / Gateway Settings / Status Monitor

B. SmartView Tracker / Audit Tab / Gateway Counters

C. This can only be monitored by a user-defined script.

D. SmartView Monitor / Gateway Status / Threshold Settings

Correct Answer: D

QUESTION 7

What is the difference between Standard and Specific Sign On methods?

A. Standard Sign On allows the user to be automatically authorized for all services that the rule allows, but re-authenticate for each host to which he is trying to connect. Specific Sign On requires that the user re-authenticate for each service.

B. Standard Sign On requires the user to re-authenticate for each service and each host to which he is trying to connect. Specific Sign On allows the user to sign on only to a specific IP address.

C. Standard Sign On allows the user to be automatically authorized for all services that the rule allows. Specific Sign On

requires that the user re-authenticate for each service and each host to which he is trying to connect.

D. Standard Sign On allows the user to be automatically authorized for all services that the rule allows. Specific Sign On requires that the user re-authenticate for each service specifically defined in the window Specific Action Properties.

Correct Answer: C

QUESTION 8
