- A. Run cpconfig, select the Certificate\\'s Fingerprint option and view the fingerprint
- B. Run cpconfig, select the GUI Clients option and view the fingerprint
- C. Run cpconfig, select the Certificate Authority option and view the fingerprint
- D. Run sysconfig, select the Server Fingerprint option and view the fingerprint

Correct Answer: A

## QUESTION 4

Which of the following operating systems support numbered VTI\\'s?

- A. Secure PlatformPro
- B. Solaris
- C. IPSO 4.0 +
- D. Windows Server 2008

Correct Answer: A

## QUESTION 5

Review the cphaprob state command output from a New Mode High Availability cluster member.

```
Cluster Mode: New High Availability (Active Up)
```

Number	Unique IP Address	Assigned Load	State
1 <local>	192.168.1.1	0%	down
2	192.168.1.2	100%	active

Which machine has the highest priority?

- A. 192.168.1.2, because its state is active
- B. 192.168.1.1, because its number is 1
- C. 192.168.1.1, because it is
- D. This output does not indicate which machine has the highest priority.

Correct Answer: B

---

#### QUESTION 6

You are preparing computers for a new ClusterXL deployment. For your cluster, you plan to use four machines with the following configurations:

Cluster Member 1: OS:Secure Platform, NICs: QuadCard, memory: 1 GB, Security Gateway only, version:R76

Cluster Member 2: OS:Secure Platform, NICs: 4 Intel 3Com, memory: 1 GB, Security Gateway only, version:R76

Cluster Member 3: OS:Secure Platform, NICs: 4 other manufacturers, memory: 512 MB, Security Gateway only, version:R76

Security Management Server: MS Windows 2003, NIC: Intel NIC (1), Security Gateway and primary Security Management Server installed, version:R76

Are these machines correctly configured for a ClusterXL deployment?

- A. No, the Security Gateway cannot be installed on the Security Management Pro Server.
- B. No, Cluster Member 3 does not have the required memory.
- C. Yes, these machines are configured correctly for a ClusterXL deployment.
- D. No, the Security Management Server is not running the same operating system as the cluster members.

Correct Answer: C

---

#### QUESTION 7

Which of the following statements accurately describes the migrate command?

- A. upgrade\_export is used when upgrading the Security Gateway, and allows certain files to be included or excluded before exporting.

- B. upgrade\_export stores network-configuration data, objects, global properties, and the database revisions prior to upgrading the Security Management Server.
- C. Used primarily when upgrading the Security Management Server, migrate stores all object databases and the conf directories for importing to a newer version of the Security Gateway
- D. Used when upgrading the Security Gateway, upgrade\_export includes modified files, such as in the directories /lib and /conf.

Correct Answer: C

---

### QUESTION 8
