## QUESTION 1

How many interfaces can you configure to use the Multi-Queue feature?

- A. 10 interfaces
- B. 3 interfaces
- C. 4 interfaces
- D. 5 interfaces

Correct Answer: D

Note

1.

Multi-Queue lets you configure a maximum of five interfaces

2.

You must reboot the gateway after changing the Multi-Queue configuration Reference:

---

## QUESTION 2

Which pre-defined Permission Profile should be assigned to an administrator that requires full access to audit all configurations without modifying them?

- A. Auditor
- B. Read Only All
- C. Super User
- D. Full Access

Correct Answer: B

Reference: [https://sc1.checkpoint.com/documents/R80/CP\\_R80\\_SecMGMT/html\\_frameset.htm?topic=documents/R80/CP\\_R80\\_SecMGMT/124265](https://sc1.checkpoint.com/documents/R80/CP_R80_SecMGMT/html_frameset.htm?topic=documents/R80/CP_R80_SecMGMT/124265)

---

## QUESTION 3

In R80, where do you manage your Mobile Access Policy?

- A. Access Control Policy
- B. Through the Mobile Console

C. Shared Gateways Policy

D. From the Dedicated Mobility Tab

Correct Answer: A

---

#### QUESTION 4

What cloud-based SandBlast Mobile application is used to register new devices and users?

A. Check Point Protect Application

B. Management Dashboard

C. Behavior Risk Engine

D. Check Point Gateway

Correct Answer: D

---

#### QUESTION 5

If there are two administration logged in at the same time to the SmartConsole, and there are objects locked for editing, what must be done to make them available to other administrators? (Choose the BEST answer.)

A. Publish or discard the session.

B. Revert the session.

C. Save and install the Policy.

D. Delete older versions of database.

Correct Answer: A

---

#### QUESTION 6

Which is NOT an example of a Check Point API?

A. Gateway API

B. Management API

C. OPSEC SDK

D. Threat Prevention API

Correct Answer: A

---

**QUESTION 7**

What is the purpose of Priority Delta in VRRP?

- A. When a box up, Effective Priority = Priority + Priority Delta
- B. When an Interface is up, Effective Priority = Priority + Priority Delta
- C. When an Interface fail, Effective Priority = Priority - Priority Delta
- D. When a box fail, Effective Priority = Priority - Priority Delta

Correct Answer: C

Each instance of VRRP running on a supported interface may monitor the link state of other interfaces.

The monitored interfaces do not have to be running VRRP. If a monitored interface loses its link state, then VRRP will decrement its priority over a VRID by the specified delta value and then will send out a new VRRP HELLO packet. If the new effective priority is less than the priority a backup platform has, then the backup platform will begin to send out its own HELLO packet.

Once the master sees this packet with a priority greater than its own, then it releases the VIP.

---

**QUESTION 8**

In which formats can Threat Emulation forensics reports be viewed in?

- A. TXT, XML and CSV
- B. PDF and TXT
- C. PDF, HTML, and XML
- D. PDF and HTML

Correct Answer: C

---

**QUESTION 9**

Which view is NOT a valid CPVIEW view?

- A. IDA
- B. RAD

C. PDP

D. VPN

Correct Answer: C

---

## QUESTION 10

What is the minimum amount of RAM needed for a Threat Prevention Appliance?

A. 6 GB

B. 8GB with Gaia in 64-bit mode

C. 4 GB

D. It depends on the number of software blades enabled

Correct Answer: C

---

## QUESTION 11

When an encrypted packet is decrypted, where does this happen?

A. Security policy

B. Inbound chain

C. Outbound chain

D. Decryption is not supported

Correct Answer: A

---

## QUESTION 12

On R80.10 the IPS Blade is managed by: A. Threat Protection policy

B. Anti-Bot Blade

C. Threat Prevention policy

D. Layers on Firewall policy

Correct Answer: C

Reference: <https://www.checkpoint.com/downloads/product-related/r80.10-mgmt-architecture-overview.pdf>

---

## QUESTION 13

Which firewall daemon is responsible for the FW CLI commands?

- A. fwd
- B. fwm
- C. cpm
- D. cpd

Correct Answer: A

---

## QUESTION 14

Which User-mode process is responsible for the FW CLI commands?

- A. fwd
- B. fwm
- C. cpm
- D. cpd

Correct Answer: B

fwm -- Firewall Management (fwm) is on all management products, including Multi-Domain Security Management, and on products that require direct GUI access, such as SmartEvent. The fwm process is used mainly for backward compatibility of gateways. It provides GUI client communication, database manipulation, policy compilation, and Management High Availability synchronization.
