QUESTION 1

What effect does natural daylight from a window have on video?

- A. It causes the video to be out of focus.
- B. It causes the picture to have a bluish tint.
- C. It causes the iris to close, which makes images appear dark.
- D. It causes the iris to open, which makes images appear bright

Correct Answer: BC

QUESTION 2

Videoconference rate of a H.323 IP Call requires the packet examination of which of the following?

- A. Medium Access Control Layer
- B. IP Header
- C. UDP Header
- D. TCP Layer
- E. Packet Payload
- F. Gatekeeper Registration Request
- G. RTP Header

Correct Answer: E

QUESTION 3

Which of the following refers to Line coding used with the 2-wire, U reference of a Basic Rate Interface?

- A. BRTZ-AMI
- B. HDB3
- C. 2B1Q

Correct Answer: C

QUESTION 4

High Definition Video connections include which of the following? (select two)

- A. Three XLR connectors attached to one COAX cable per connector
- B. One DB 25 Connector attached to several COAX cables
- C. Three BNC connectors attached to one COAX cable per connector
- D. Four 3.5mm Mini plugs attached to one COAX cable per connector plug
- E. One DB 15 HD connector attached to three COAX cables

Correct Answer: CE

QUESTION 5

A mic-level audio signal will measure as:

- A. 10 kiloVolt.
- B. 10 miliVolt.
- C. 10 gigaVolt.
- D. 10 Watt.
- E. 10 Amp.

Correct Answer: B

QUESTION 6

Which, of the following items, best describes gain?

- A. Increase only to a signal voltage as it passes through a given component
- B. Increase or decrease to a signal voltage as it passes through a given component
- C. Decrease only to a signal voltage as it passes through a given system component
- D. None of the above

Correct Answer: B

QUESTION 7

Quarter Common Intermediate Format has:

- A. twice the resolution of CIF.
- B. half the number of lines of 4CIF.
- C. four times more resolution than CIF.

D. None of the above

Correct Answer: D

QUESTION 8

E1 trunks are capable of supporting up to:

- A. 6 - 384,000 bit per second connections.
- B. 7 - 384,000 bit per second connections.
- C. 5 - 384,000 bit per second connections.
- D. 4 - 384,000 bit per second connections.

Correct Answer: C

QUESTION 9

Media Gateways will:

- A. process information for Video File Transfers.
- B. process audio for Multipoint Conferencing.
- C. provide Bearer to Bearer Channel Switching.
- D. provide Bearer Channel termination and Media Stream termination and conversion.
- E. terminate Packet Networks.

Correct Answer: D

QUESTION 10

Videoconferencing channel synchronous networks may be defined as (Select two of the following options.)

- A. networks capable of speeds up to 2,000,000 bits per second.
- B. networks that can transmit but not receive at the same time.
- C. networks that provide no clocks.
- D. networks that can transmit and receive simultaneously with no clock.
- E. networks that require clocks for transmit and receive.

Correct Answer: AE

QUESTION 11

MCU operation of H.323 Videoconferencing over IP is defined as which two components?

- A. Network Controller and Multipoint Controller
- B. Multipoint Controller and Multipoint Processor
- C. Multipoint Processor and Video Controller
- D. Audio and Video Controller
- E. All of the above

Correct Answer: B

QUESTION 12

Which of the following are the correct descriptions of B and H0? (Select two of the following options.)

- A. "B-Channel" has 64 kilobits per second of bandwidth
- B. "B-Channel" has 48 kilobits per second of bandwidth
- C. "B-Channel" has 128 kilo bits per second of bandwidth
- D. "H0-Channel" has 1.920 million bits per second of bandwidth
- E. "H0-Channel" has 1.544 million bits per second of bandwidth
- F. "H0-Channel" has 384 kilobits per second of bandwidth

Correct Answer: AF

QUESTION 13

Public Switched Telephone Company channel network components starting at the customer site and continuing to the Far-End site are set up as follows:

- A. Station / Interoffice Facilities / Local Exchange Carrier Digital Switch
- B. Station / Local Loop / Interoffice Facilities / Local Exchange Carrier Digital Switch
- C. Station / Interoffice Facilities / Local Loop / Local Exchange Carrier Digital Switch
- D. Station / Local Loop / Local Exchange Carrier Digital Switch / Interoffice Facilities

Correct Answer: D

QUESTION 14

Common Intermediate Format is approximately how many pixels per picture?

- A. 25,000
- B. 100,000
- C. 500,000
- D. 100,000,000

Correct Answer: B

QUESTION 15

High-Definition Videoconferencing will require and use:

- A. the same camera from NTSC and PAL VTC systems
- B. typical off the shelf web camera
- C. high-definition camera
- D. all of the above

Correct Answer: C
