QUESTION 1

Which two methods should be used for generating a configuration data and statistics report for evaluation by Citrix? (Choose two.)

- A. Run lshomel using the command-line interface.
- B. Run lshow techsupportl using the command-line interface.
- C. Click the Call Home link under the Technical Support Tools section in the NetScaler Configuration Utility.
- D. Click the Download trace files link under the Technical Support Tools section in the NetScaler Configuration Utility.
- E. Click the Generate support file link under the Technical Support Tools section in the NetScaler Configuration Utility.

Correct Answer: BE

QUESTION 2

A Citrix Administrator needs to shorten the URL for users to connect to a StoreFront website without knowing the store name.

Which policy should the administrator use to accomplish this requirement?

- A. Rewrite
- B. AppQoE
- C. Spillover
- D. Responder

Correct Answer: A

QUESTION 3

Scenario: A Citrix Administrator needs to install a new certificate on the NetScaler Gateway virtual server. The administrator was provided a new PFX certificate and has imported the PKCS12 file to the NetScaler. What should the administrator do to complete the installation of the certificate?

- A. Create the RSA key and bind to the virtual server.
- B. Install the Cert-Key Pair and bind to the virtual server.
- C. Split the PEM file, install Cert-Key Pair and bind to the virtual server.
- D. Create the CSR and install the Cert-Key Pair, and bind to the virtual server.

Correct Answer: C

QUESTION 4

Scenario: A Citrix Administrator added an Access Control List (ACL) to restrict access to the management IP address of the NetScaler. The administrator is still able to connect from a disallowed subnet, even though the ACL is enabled.

What is a possible reason why the administrator is still able to connect from a disallowed subnet?

- A. No vLAN was specified.
- B. ACLs are only applied to virtual IPs (vIPs).
- C. The ACL needs to be activated.
- D. An established connection was in place.

Correct Answer: C

QUESTION 5

A company plans to deploy secure LDAP authentication to their existing NetScaler Gateway implementation.

What should an administrator enable to support secure LDAP?

- A. SSL security on the virtual server
- B. Secure LDAP in a pre-authentication policy
- C. SSL security type in an authentication policy
- D. Secure LDAP in the NetScaler Gateway Global settings

Correct Answer: C

QUESTION 6

Scenario: A Citrix Administrator configured the following preauthentication policies for NetScaler Gateway. Priority 20 Policy2 bound to virtual server Priority 10 Policy1 bound to AAA Global Priority 10 Policy3 bound to virtual server Priority 20 Policy4 bound to AAA Global

In which order are the policies applied?

- A. Policy2, Policy3, Policy1, Policy4
- B. Policy1, Policy2, Policy3, Policy4
- C. Policy4, Policy2, Policy1, Policy3

D. Policy3, Policy1, Policy4, Policy2

Correct Answer: C

QUESTION 7

Which two tasks must a Citrix Administrator complete to enable Client Certificate Authentication on the NetScaler Gateway? (Choose two.)

- A. Create a pre-authentication policy.
- B. Create an LDAP authentication policy.
- C. Import the root certificate onto the NetScaler Gateway.
- D. Import all client certificates onto the NetScaler Gateway.
- E. Enable the Client Authentication option on the virtual server.

Correct Answer: CE

QUESTION 8

Which script should a Citrix Administrator use when creating an Active Directory load balance monitor through the NetScaler?

- A. nsldap.pl
- B. nssnmp.pl
- C. nsntlm-lwp.pl
- D. nsbmradius.pl

Correct Answer: A

QUESTION 9

What should a Citrix Administrator configure to optimize an internal NetScaler Gateway virtual server when more bandwidth is available for use and other websites are NOT affected?

- A. Windows Scaling within TCP parameters.
- B. Max Connections within HTTP parameters.
- C. A Net Profile that is applied to the NetScaler Gateway virtual server.
- D. Windows Scaling within a TCP Profile that is applied to the NetScaler Gateway virtual server.

Correct Answer: D

QUESTION 10

Scenario: A new software package has been developed at an organization. The organization has hired Field Sales Engineers to accompany Sales Executives when demonstrating the new software package. The demonstration software is hosted on an internal web server. A Citrix Administrator needs to configure the NetScaler to ensure end-to-end connectivity. Which feature on the NetScaler must the administrator ensure is enabled to provide secure access from the public network?

- A. Sure Connect
- B. SSL Offloading
- C. Application Firewall
- D. Global Server Load Balancing

Correct Answer: B

QUESTION 11

Which NetScaler IP address type is created when the below command is executed at the command-line interface?

```
add ns ip 192.168.2.1 255.255.255.0
```

- A. virtual IP
- B. Cluster IP
- C. Subnet IP
- D. Mapped IP
- E. GSLB Site IP

Correct Answer: C

QUESTION 12

Scenario: Several users in an environment connect to corporate network resources through NetScaler Gateway.

Sometimes these users only need to connect to the corporate XenDesktop environment. Some of the users do NOT need a VPN connection.

How could an administrator configure access using NetScaler Gateway for this scenario?

- A. Enable Client Choices.
- B. Set Clientless Access to Allow.

- C. Configure a virtual server in Basic mode.
- D. Configure the Plug-in Type as WindowsjMac OS X.

Correct Answer: A

QUESTION 13

Scenario: An administrator has configured several load balancing virtual servers on a NetScaler to accelerate the Web content. After an update on the Web content platform, all the servers need the client IP address to perform tracking operations. Which two tasks should the administrator complete to pass the client IP address to all the load balancing virtual servers? (Choose two.)

- A. Activate the Source-IP feature on the service.
- B. Configurearewritepolicy, thenbinditglobally.
- C. Activate the Client-IP Header insertion on the services.
- D. Configurearesponderpolicy, thenbindittoallservers.

Correct Answer: BC

QUESTION 14

Scenario: An administrator plans to implement NetScaler to load balance Web Interface traffic. The Web Interface servers are using standard non-secure ports. Company policy states that all external traffic must be secure. The administrator has added the servers for the Web Interface under Load Balancing. In order to load balance the Web Interface traffic and comply with company policy, the administrator should add services for and create an . (Choose the correct set of options to complete the sentence.)

- A. SSL; SSL virtual server
- B. SSL; HTTP virtual server
- C. HTTP; SSL virtual server
- D. HTTP; HTTP virtual server

Correct Answer: C

QUESTION 15

Scenario: An administrator needs to configure a NetScaler to provide access to users on an Exchange platform. The users will only use the IMAP4 protocol.

Which three features should the administrator configure for this scenario? (Choose three.)

- A. SSL Offload

- B. Compression
- C. Load balancing
- D. Health monitoring
- E. Integrated caching
- F. Route health injection

Correct Answer: ACD
