**QUESTION 1**

What three configurations have to be done to ensure that a portal can correctly display content from WebCenter Content server?

- A. OHS (Oracle HTTP Server) configured to front end both WebCenter Portal and WebCenter Content
- B. WebCenter Portal and Content running on the same server
- C. an SSO (Single Sign-On) solution configured between WebCenter Portal and WebCenter Content
- D. web context root set on the content repository connection
- E. WebCenter Portal and Content configured in the same WebLogic server domain

Correct Answer: BCE

---

**QUESTION 2**

Which two scoped managed beans must be Serializable in order to work without errors in a highly available application?

- A. Session scope
- B. Backing bean scope
- C. View scope
- D. Transient scope

Correct Answer: BC

---

**QUESTION 3**

Which two statements are true about the relationship between ADF Faces and JSF?

- A. ADF Faces is based on JSF.
- B. ADF Faces is a set of visual components built using JSF.
- C. JSF is loosely based on ADF Faces.
- D. ADF Faces uses Trinidad components to render visual components using a JSF-like syntax.

Correct Answer: BD

---

**QUESTION 4**

Users Lucy and Tom are editing a page or task flow simultaneously using Page Composer. How are the concurrency

issues handled when Lucy saves the page or task flow first and Tom saves it later?

- A. Lucy's changes are overwritten with Tom's changes.
- B. Tom's changes are overwritten with Lucy's changes.
- C. None of the changes are saved.
- D. A cyclic redundancy error is displayed on the screen.

Correct Answer: D

---

**QUESTION 5**

Which two portal/shared assets show up on a portal page when it is being viewed?

- A. Page templates show up because they are the building blocks of a page.
- B. Navigation model shows up on a page as links, and any such visualizations
- C. Resource Catalog shows up indicating all the items that can be added to the page.
- D. Data Controls

Correct Answer: BC

---

**QUESTION 6**

A customer has a requirement to display BI reports on portal pages. What approach would you suggest?

- A. Develop a custom task flow to render BI data similar to an existing BI report.
- B. Add a BI folder that contains these reports to the Resource Catalog.
- C. Use a report URL in iFrame.
- D. Use Pagelet Producer to register a pagelet for each report.

Correct Answer: B

---

**QUESTION 7**

Which statement is not true?

- A. Responsive Design allows a page to change content visibility and or layout in the browser if the browser is resized.
- B. A page using Responsive Design is refreshed in the portal server when the size of the browser is changed.
- C. Responsive Design includes adding server-side logic to conditionally display areas on a page.
- D. Responsive Design allows pages to target more than one device size or orientation.

Correct Answer: D

---

**QUESTION 8**

Which three steps are needed for using custom task flows with business components in multiple portals?

- A. Create the task flow in each portal.
- B. Create the task flow once in JDeveloper.
- C. Deploy it once as a portal shared library to WebCenter Portal server.
- D. Import the task flow in each portal.
- E. Add the task flow to the desired resource catalogs.
- F. Download and update portal MDS (metadata data services) customizations for each portal.

Correct Answer: BDE

---

**QUESTION 9**

You created a portlet, and you need to get the user role inside one of the beans for the portlet. Users and roles are fetched from Lightweight Directory Access Protocol (LDAP). Which command should you use to check the role for a particular user?

- A. `RenderRequest.getUserRole()`
- B. `PortletRequest.getUserRole()`
- C. `PortletRequest.isUserInRole()`
- D. `RenderRequest.isUserInRole()`

Correct Answer: C

---

**QUESTION 10**

The DesignWebCenterSpaces application contains a file called `config.properties`. What is the purpose of this file?

- A. To enable a connection between JDeveloper and the Portal server. This will be used to upload and download assets directly from JDeveloper.
- B. It allows the developer to configure which asset types can be created or edited with this application.
- C. It is used to store classpath and library information, and the path to executables. That way, a local Portal instance can be started from JDeveloper.
- D. It is an internally used file. Developers should not have to manually configure this file, except when required by Oracle to do so.

Correct Answer: A

---

**QUESTION 11**

In which two ways can a customer enable better mobile device access for Portal users?

- A. by using personalization to create different pages for each device
- B. by using the Mobile Application Framework (MAF) application that comes bundled with Portal
- C. by creating skins and templates that follow responsive design principles
- D. by creating page variants for different devices

Correct Answer: AC

---

**QUESTION 12**

Your client is developing page templates and pages for their portal using primarily Portal Builder. During the process of building this Portal, the client uses Portal Builder and JDeveloper. Identify the initial step required to perform this round-trip development.

- A. Choose the "Save Portal" option in the Portal Administration page.
- B. Export the WebCenter Portal's database schema.
- C. Choose "Export" from the portal assets page in the Portal Builder page and save the portal asset to an archive.
- D. Connect JDeveloper to the Portal server and edit the asset online.

Correct Answer: B

---

**QUESTION 13**

WebCenter Portal supports any mail server with IMAP4 and SMTP protocol support. Which server distribution, however, has specific integration support within WebCenter Portal?

- A. IBM Lotus Notes
- B. MS Exchange
- C. UNIX Mail Server
- D. Google Mail Server
- E. Oracle Beehive

Correct Answer: E

---

## QUESTION 14

Where is the information related to a user-customized view of a page in a portal stored?

- A. Content Repository
- B. Metadata Repository
- C. in the Temp file area of each deployed instance
- D. in the user's browser cache

Correct Answer: B

---

## QUESTION 15

Identify two actions that are performed when you connect WebCenter Portal with WebCenter Content.

- A. A new folder is created in WebCenter Content, with the name of the connection.
- B. New Security Group and Accounts are created. All Portal documents use the Security Group and Accounts.
- C. The Content Presenter and other task flows are deployed to the Portal once you create the connection.
- D. Portal will start indexing WebCenter Content documents to enable full-text searching in the Portal.

Correct Answer: BC
