Correct Answer: AC

---

## QUESTION 5

You have configured a new pattern in Oracle Adaptive Access Manager (OAAM) to capture login times of devices. Your customer wants to ensure that devices that are used outside their normal times are blocked.

After creating your pattern, which two additional steps must you perform to configure OAAM to meet this requirement?

- A. Create a transaction definition for the pattern.
- B. Create a new rule in an existing policy that contains an appropriate condition to evaluate your new pattern.
- C. Link your chosen policy to the appropriate user groups.
- D. Configure a block action for your new rule.
- E. Restart the OAAM Managed Server for the pattern to take effect.

Correct Answer: AE

---

## QUESTION 6

In Security Token Service, what is the prerequisite when managing a Token Issuance Template? (Choose the best answer.)

- A. Confirm whether the desired LDAP Identity Store is registered with and configured as the Default Store.
- B. A WebGate must be registered with Oracle Identity Federation.
- C. The WSS Validation Template must be configured to accept only X.509 certificates.
- D. SAML tokens must be present in the SOAP header.

Correct Answer: D

---

## QUESTION 7

Identity two settings that are available from the common settings for a session in Oracle Access Manager system

configuration.

- A. Session Lifetime
- B. Minimum Number of Sessions per User
- C. Maximum Number of Sessions per User
- D. Session Cache Memory size
- E. Session Security Protocol

Correct Answer: AC

---

## QUESTION 8

Which statement is true about the Detached Credentials Collector (DCC) used in Oracle Access Manager?

- A. It is the default credentials collector for Oracle Access Manager 11gR1.
- B. It is the default credentials collector for Oracle Access Manager 11gR2.
- C. It is supported only by OracleAccess Manager 11gR1.
- D. It is supported only by Oracle Access Manager 11gR2.

Correct Answer: D

---

## QUESTION 9

When managing Token Issuance conditions and rules in Security Token Service, who is granted access to a requested resource through the Allow type rule?

- A. Only partners are granted access; everyone else is denied access to the resource.
- B. Only the partners and users listed in a condition are granted access; everyone else is denied access to the resource.
- C. Users listed in a condition are granted access; everyone else is denied access to the resource.
- D. Only Relying Party Partners are granted access; everyone else is denied access to the resource.

Correct Answer: B

---

## QUESTION 10
